ROR alpha (RORA) Rabbit Polyclonal Antibody - AP20414PU-M

Background: Retinoid related orphan receptor alpha (ROR alpha) is a NR1 Thyroid Hormone Like Receptor.

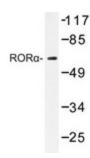

> To date, ROR alph,a bet,a and gamma subtypes have been discovered. ROR alpha has been shown to affect the development of the central nervous system. Deletion of ROR alpha in mice causes severe impairment in the differentiation of cerebellar Purkinje neurons and results in the staggerer phenotype. ROR alpha has been suggested as a potential target in the treatment of chronic inflammatory diseases, including atherosclerosis and rheumatoid

arthritis.

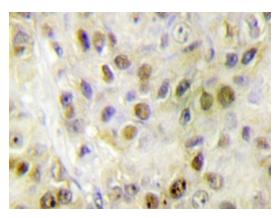

Synonyms: Nuclear receptor ROR-alpha, Nuclear receptor RZR-alpha, NR1F1, RZRA **Protein Families:**

Druggable Genome, Nuclear Hormone Receptor, Transcription Factors
