Storage: Avoid repeated freezing and thawing. Shelf life: one year from despatch. Stability: Predicted Protein Size: ~99 kDa Gene Name: hexokinase 3 Database Link: Entrez Gene 3101 Human P52790 **Background:** Hexokinases phosphorylate glucose to produce glucose 6 phosphate, thus committing glucose to the glycolytic pathway. In vertebrates there are four major glucose phosphorylating isoenzymes, designated hexokinase I, II, III and IV (glucokinase). Similar to hexokinases I and II, the allosteric enzyme hexokinase III is inhibited by its product glucose 6 phosphate. The catalytic activity of hexokinase III is associated with the C terminus while regulatory function is associated with the N terminus.
