

Product datasheet for AP20720PU-N

MET Rabbit Polyclonal Antibody

Product data:

Product Type: Primary Antibodies

Applications: IF, WB

Recommended Dilution: Western blot: 1/500 - 1/1000.

Immunofluorescence: 1/50 - 1/200.

Reactivity: Human, Mouse, Rat

Host: Rabbit

Clonality: Polyclonal

Specificity: This antibody detects endogenous levels of Met protein.

(region surrounding Thr1343)

Formulation: Phosphate buffered saline (PBS), pH 7.2

State: Aff - Purified

State: Liquid purified Ig fraction Preservative: 0.05% sodium azide

Concentration: 1.0 mg/ml

Purification: Affinity-chromatography using epitope-specific immunogen; purity is > 95% (by SDS-PAGE)

Conjugation: Unconjugated

Storage: Store undiluted at 2-8°C for one month or (in aliquots) at -20°C for longer.

Avoid repeated freezing and thawing.

Stability: Shelf life: one year from despatch.

Predicted Protein Size: ~ 170 kDa

Gene Name: MET proto-oncogene, receptor tyrosine kinase

Database Link: Entrez Gene 17295 MouseEntrez Gene 24553 RatEntrez Gene 4233 Human

MET Rabbit Polyclonal Antibody - AP20720PU-N

Background: The c-Met oncogene was originally isolated from a chemical carcinogentreated human

osteogenic sarcoma cell line by transfection analysis in NIH/ 3T3 cells. The Met protooncogene product was identified as a transmembrane receptor-like protein with tyrosine kinase activity that is expressed in many tissues. A high proportion of spontaneous NIH/3T3 transformants overexpress c-Met and by transfection analysis the c-Met proto-oncogene has been shown to exhibit transforming activity. Tyrosine phosphorylation of apparently normal Met protein has also been observed in certain human gastric carcinoma cell lines. The c-Met gene product has been identified as the cell surface receptor for hepatocyte growth factor, a

plasminogenlike protein thought to be humoral mediator of liver regeneration.

Synonyms: Hepatocyte growth factor receptor, MET, Scatter factor receptor, HGF/SF receptor, c-Met

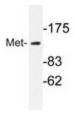

Protein Families: Druggable Genome, Protein Kinase, Transmembrane

Protein Pathways: Adherens junction, Axon guidance, Colorectal cancer, Cytokine-cytokine receptor interaction,

Endocytosis, Epithelial cell signaling in Helicobacter pylori infection, Focal adhesion,

Melanoma, Pathways in cancer, Renal cell carcinoma
