| | NF-kB p65 (RELA) Rabbit Polyclonal Antibody – AP20743PU-N |
|-------------------|---|
| Background: | p65 is a subunit of the nuclear factor kappa B. The transcription factor NFkappaB is widely recognized as a critical mediator of immune and inflammatory responses. In most cell types, NFkappaB is found in the cytoplasm where it is associated with an inhibitory prd in many tissues. A high proportion of spontaneous NIH/3T3 transformants overexpress c-Met and by transfection analysis the c-Met proto-oncogene has been shown to exhibit transforming activity. |
| Synonyms: | NF kappa B p65, NFkB p65, Transcription factor p65, Rel A, NFKB3 |
