

Product datasheet for AP20757PU-N

NF2 Rabbit Polyclonal Antibody

Product data:

Product Type: Primary Antibodies

Applications: IF, WB

Recommended Dilution: Western blot: 1/500-1/1000.

Immunofluorescence: 1/50-1/200.

Reactivity: Human, Mouse, Rat

Host: Rabbit

Clonality: Polyclonal

Specificity: This antibody detects endogenous levels of Merlin protein.

(region surrounding Thr512)

Formulation: Phosphate buffered saline (PBS), pH~7.2

State: Aff - Purified

State: Liquid purified Ig fraction (> 95% pure by SDS-PAGE).

Preservative: 0.05% Sodium Azide

Concentration: 1.0 mg/ml

Purification: Affinity Chromatography using epitope-specific immunogen.

Conjugation: Unconjugated

Storage: Store undiluted at 2-8°C for one month or (in aliquots) at -20°C for longer.

Avoid repeated freezing and thawing.

Stability: Shelf life: one year from despatch.

Predicted Protein Size: ~70 kDa

Gene Name: neurofibromin 2 (merlin)

Database Link: Entrez Gene 18016 MouseEntrez Gene 25744 RatEntrez Gene 4771 Human

Background: Neurofibromin 2 (NF2) is a tumor suppressor gene encoding the protein Merlin. Merlin is

closely related to the ERM (ezrin, radixin, moesin) family of proteins. The precise funtion of Merlin is not clear. It is thought to provide a link between the actin cytoskeleten and membrane associated proteins, playing a role in transduction of extracellular signals. It has

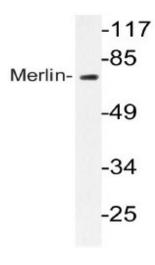

been implicated in cell proliferation and cellular motility. Mutations in the NF2 gene cause neurofibromatosis type II, a condition characterised by the development of tumors in the

central nervous system.

Synonyms: Neurofibromin-2, NF2, SCH, Schwannomin, Schwannomerlin

Protein Families: Druggable Genome
