Product Type:	Primary Antibodies
Applications:	WB
Recommended Dilution:	Western blot: 1/500 - 1/1000.
Reactivity:	Human, Mouse, Rat
Host:	Rabbit
Clonality:	Polyclonal
Specificity:	This antibody detects endogenous levels of c-Met protein only when phosphorylated at Tyr1349.
Formulation:	Phosphate buffered saline (PBS), pH 7.2 State: Aff - Purified State: Liquid purified Ig fraction Preservative: 0.05% sodium azide
Concentration:	1.0 mg/ml
Purification:	Affinity chromatography (> 95% (by SDS-PAGE)
Conjugation:	Unconjugated
Storage:	Store undiluted at 2-8°C for one month or (in aliquots) at -20°C for longer. Avoid repeated freezing and thawing.
Stability:	Shelf life: one year from despatch.
Predicted Protein Size:	~ 170 kDa
Gene Name:	MET proto-oncogene, receptor tyrosine kinase
Database Link:	<u>Entrez Gene 17295 MouseEntrez Gene 24553 RatEntrez Gene 4233 Human</u> <u>P08581</u>

#### MET pTyr1349 Rabbit Polyclonal Antibody – AP20841PU-S Background: The c-Met oncogene was originally isolated from a chemical carcinogen-treated human osteogenic sarcoma cell line by transfection analysis in NIH/3T3 cells. The Met protooncogene product was identified as a transmembrane receptorlike protein with tyrosine kinase activity that is expressed in many tissues. A high proportion of spontaneous NIH/3T3 transformants overexpress c-Met and by transfection analysis the c-Met proto-oncogene has been shown to exhibit transforming activity. Tyrosine phosphorylation of apparently normal Met protein has also been observed in certain human gastric carcinoma cell lines. Tyrosine phosphorylation enhances the receptor kinase activity, while serine phosphorylation of Met on residue 985 has an inhibitory effect. The c-Met gene product has been identified as the cell surface receptor for hepatocyte growth factor, a plasminogen-like protein thought to be a humoral mediator of liver regeneration. Synonyms: Hepatocyte growth factor receptor, MET, Scatter factor receptor, HGF/SF receptor, c-Met **Protein Families:** Druggable Genome, Protein Kinase, Transmembrane Adherens junction, Axon guidance, Colorectal cancer, Cytokine-cytokine receptor interaction, **Protein Pathways:** Endocytosis, Epithelial cell signaling in Helicobacter pylori infection, Focal adhesion, Melanoma, Pathways in cancer, Renal cell carcinoma
