**Background:** Neuromedin U (NmU) is a vertebrate peptide which stimulates uterine smooth muscle

contraction and causes selective vasoconstriction. Like most other active peptides, it is

proteolytically processed from a larger precursor protein. The mature peptides are 8 (NmU-8) to 25 (NmU-25) residues long and C-terminally amidated. The sequence of the C-terminal

extremity of NmU is extremely well conserved across species.
