

## Product datasheet for **AP21244PU-N**

### Collagenase Rabbit Polyclonal Antibody

#### Product data:

Product Type:	Primary Antibodies
Applications:	ELISA, ID, IF, IP, R, WB
Recommended Dilution:	This product is intended for use in precipitating and non-precipitating antibody-binding assays (such as e.g., ELISA and Western blotting and Immunofluorescence or Histochemical techniques), to prepare an insoluble immuno-affinity Adsorbent, for labelling with a Marker of the customer's own choice. <i>Working dilutions in non-precipitating antibody-binding techniques: 1/10,000-1/50,000.</i>
Reactivity:	Clostridium histolyticum
Host:	Rabbit
Isotype:	IgG
Clonality:	Polyclonal
Immunogen:	Collagenase is isolated and purified from Clostridium histolyticum (containing the different isoforms). Freund's complete adjuvant is used in the first step of the immunization procedure.
Specificity:	Collagenase from Clostridium histolyticum (containing the different isoforms). The reagents were evaluated for potency, purity and specificity using most or all of the following techniques: Immunoelectrophoresis, Cross-Immunoelectrophoresis, single Radial Immunodiffusion (Ouchterlony), block titration, ELISA, Immunoblotting and Enzyme Inhibition. Cross-reactivities against enzymes of other sources may occur but have not been determined.
Formulation:	PBS, pH 7.2 stabilized with Dextran without preservatives and foreign proteins State: Aff - Purified State: Lyophilized purified Hyperimmune IgG fraction
Reconstitution Method:	Restore by adding 0.5 ml of sterile distilled water
Purification:	Solid Phase Affinity Chromatography
Conjugation:	Unconjugated

- Storage:** Store the antibody lyophilized at 2-8°C and reconstituted at 2-8°C for one week or (in aliquots) at -20°C for longer.  
If a slight precipitation occurs upon storage, this should be removed by centrifugation.
- Stability:** Shelf life: one year from despatch
