# **GLR1 Rabbit Polyclonal Antibody**

### **Product data:**

Product Type: Primary Antibodies

Applications: ELISA, ID, IF, IP, R, WB

**Recommended Dilution:** This product is intended for use in precipitating and non-precipitating antibody-binding

assays (such as e.g., ELISA and Western blotting and Immunofluorescence or Histochemical techniques), to prepare an insoluble immuno-affinity adsorbent, for labelling with a marker

of

the customer's own choice.

Working dilutions in non-precipitating antibody-binding techniques: 1/1,000-1/8,000.

**Reactivity:** Bakers Yeast

Host: Rabbit Isotype: IgG

**Clonality:** Polyclonal

**Immunogen:** Glutathione Reductase isolated and purified from Baker's Yeast.

Freund's complete adjuvant is used in the first step of the immunization procedure.

**Specificity:** The antibody recognizes Glutathione Reductase from Baker's yeast.

The reagents were evaluated for potency, purity and specificity using most or all of the following techniques: Immunoelectrophoresis, Cross-Immunoelectrophoresis, single Radial

Immunodiffusion (Ouchterlony), block titration, ELISA, Immunoblotting and Enzyme

Inhibition.

Cross-reactivities against enzymes of other sources may occur but have not been

determined.

**Formulation:** PBS, pH 7.2 without preservatives and foreign proteins

State: Azide Free

State: Lyophilized hyperimmune IgG fraction

**Reconstitution Method:** Restore by adding 1.0 ml of sterile distilled water

**Concentration:** lot specific

**Purification:** Ammonium Sulphate Precipitation and Ion Exchange Chromatography

Conjugation: Unconjugated

### **GLR1 Rabbit Polyclonal Antibody - AP21307AF-N**

Storage: Store the antibody lyophilized at 2-8°C and reconstituted at 2-8°C for one week or (in aliquots)

at -20°C for longer.

If a slight precipitation occurs upon storage, this should be removed by centrifugation.

**Stability:** Shelf life: one year from despatch.

Database Link: P41921

**Background:** Glutathione reductase (GR) is a member of pyridine nucleotide-disulfideoxidoreductases,

which includes the closely related enzymes thioredoxin reductase, lipoamide dehydrogenase, trypanothione reductase and mercuric ion reductase. GR is a cytoplasmic flavoenzyme widely distributed in aerobic organisms. The dimeric protein is composed of two identical subunits, each containing 1 FAD and 1 redox-active disulfide/dithiol as components of the catalytic apparatus. It plays a role in maintaining glutathione(GSH) in its reduced form by catalyzing the reduction of glutathione disulfide (GSSG): GSSG + NADPH + H+ ?2GSH + NADP+. In mosteukaryotic cells, GR maintains the ratio of [GSH]/[GSSG], and participates in several vital functions such as the detoxification of reactive oxygen species as well as protein and DNA

biosynthesis.

Synonyms: GRase, GR, GSR, GLUR, GRD1
