

Product datasheet for AP21333AF-N

LDH2 H3M Isozyme Rabbit Polyclonal Antibody

Product data:

| Applications: | ELISA, ID, IF, IP, R, WB |
|----------------|--|
| | This product is intended for use in precipitating and non-precipitating antibody-binding assays such as e.g., ELISA and Western blotting and Immunofluorescence or Histochemical techniques (Up to 1/1,000). |
| Reactivity: | Human |
| Host: | Rabbit |
| lsotype: | IgG |
| Clonality: | Polyclonal |
| - | L-Lactic dehydrogenase, LDH-2(H3M) isoenzyme, is isolated and purified from Human erythrocytes. Freund's complete adjuvant is used in the first step of the immunization procedure |
| | The reagents were evaluated for potency, purity and specificity using most or all of the following techniques: Immunoelectrophoresis, Cross-Immunoelectrophoresis, single Radial Immunodiffusion (Ouchterlony), block titration, ELISA, Immunoblotting and Enzyme Inhibition. Cross-reactivities against enzymes of other sources may occur but have not been determined. |
| | PBS, pH 7.2 without preservatives and foreign proteins. State: Azide Free State: Lyophilized IgG fraction. |
| Concentration: | lot specific |
| Purification: | Ammonium Sulphate Precipitation and Ion Exchange Chromatography |
| Conjugation: | Unconjugated |
| | Store the antibody lyophilized at 2-8°C and reconstituted at 2-8°C for one week or (in aliquots) at -20°C for longer. If a slight precipitation occurs upon storage, this should be removed by centrifugation. |
| Stability: | Shelf life: one year from despatch. |

| | LDH2 H3M Isozyme Rabbit Polyclonal Antibody – AP21333AF-N |
|-------------|---|
| Background: | Lactate dehydrogenase is an enzyme present in a wide variety of organisms, including plants and animals. It catalyses the interconversion of pyruvate and lactate with concomitant interconversion of NADH and NAD+. Isoforms of the enzyme include LDH 1 (4H) in the heart, LDH 2 (3H1M) in the reticuloendothelial system, LDH 3 (2H2M) in the lungs, LDH 4 (1H3M) in the kidneys and LDH 5 (4M) in the liver and striated muscle. The M and H subunits are |

encoded by two different genes.
