

## Product datasheet for **AP21405AF-N**

### Beta-galactose dehydrogenase Rabbit Polyclonal Antibody

#### Product data:

Product Type:	Primary Antibodies
Applications:	ELISA, ID, IF, IP, R, WB
Recommended Dilution:	This antibody can be used in precipitating and non-precipitating antibody-binding assays (such as e.g., ELISA and Western blotting and Immunofluorescence or Histochemical techniques), to prepare an insoluble immuno-affinity adsorbent, for labelling with a marker of choice. <u>Recommended Dilutions:</u> Non-precipitating antibody-binding techniques: 1/100-1/1,000.
Reactivity:	<i>Pseudomonas fluorescens</i>
Host:	Rabbit
Isotype:	IgG
Clonality:	Polyclonal
Immunogen:	Beta-Galactose Dehydrogenase is isolated and purified from <i>Pseudomonas fluorescens</i> . Freund's complete adjuvant is used in the first step of the immunization procedure.
Specificity:	This antibody is polyclonal immunologic reagents to beta-Galactose Dehydrogenase from <i>Pseudomonas fluorescens</i> . The reagents were evaluated for potency, purity and specificity using most or all of the following techniques: Immunoelectrophoresis, Cross-Immunoelectrophoresis, single Radial Immunodiffusion (Ouchterlony), block titration, ELISA, Immunoblotting and Enzyme Inhibition. Cross-reactivities against enzymes of other sources may occur but have not been determined.
Formulation:	PBS, pH 7.2 without preservatives and foreign proteins State: Azide Free State: Lyophilized hyperimmune IgG fraction
Reconstitution Method:	Restore by adding 1.0 ml of sterile distilled water
Concentration:	lot specific
Purification:	Ammonium Sulphate Precipitation and Ion Exchange Chromatography
Conjugation:	Unconjugated

**Storage:** Store the antibody lyophilized at 2-8°C and reconstituted at 2-8°C for one week or (in aliquots) at -20°C for longer.  
If a slight precipitation occurs upon storage, this should be removed by centrifugation.

**Stability:** Shelf life: one year from despatch.
