

Product datasheet for **AP21412BT-N**

NADH-FMN Oxidoreductase (Photobacterium) Rabbit Polyclonal Antibody

Product data:

Product Type:	Primary Antibodies
Applications:	ELISA, ID, IF, IP, R, WB
Recommended Dilution:	This product is intended for use in precipitating and non-precipitating antibody-binding assays (such as e.g., ELISA and Western blotting and Immunofluorescence or Histochemical techniques). <u>Recommended Dilutions:</u> Non-precipitating antibody-binding techniques: 1/100-1/1,000.
Reactivity:	Photobacterium fischerii
Host:	Rabbit
Isotype:	IgG
Clonality:	Polyclonal
Immunogen:	NADH-FMN oxidoreductase isolated and purified from Photobacterium fischeri. Freund's complete adjuvant is used in the first step of the immunization procedure.
Specificity:	This antibody is polyclonal immunologic reagents to NADH-FMN oxidoreductase from <i>Photobacterium fischeri</i> . The reagents were evaluated for potency, purity and specificity using most or all of the following techniques: Immunoelectrophoresis, Cross-Immunoelectrophoresis, single Radial Immunodiffusion (Ouchterlony), block titration, ELISA, Immunoblotting and Enzyme Inhibition. Cross-reactivities against enzymes of other sources may occur but have not been determined.
Formulation:	PBS, pH 7.2 without preservatives and foreign proteins Label: Biotin State: Lyophilized hyperimmune IgG fraction Molar ratio: Biotin/IgG ~5.5
Concentration:	lot specific
Purification:	Ammonium Sulphate Precipitation and Ion Exchange Chromatography
Conjugation:	Biotin

- Storage:** Store the antibody lyophilized at 2-8°C and reconstituted at 2-8°C for one week or (in aliquots) at -20°C for longer.
If a slight precipitation occurs upon storage, this should be removed by centrifugation.
- Stability:** Shelf life: one year from despatch.
