## gamma Catenin (JUP) (N-term) Rabbit Polyclonal Antibody - AP23241PU-N

**Background:** Junction Plakoglobin (JUP) ,also knows as catenin gamma, is a major cytoplasmic protein that

occurs in a soluble and a membrane-associated form and is the only known constituent common to the submembranous plaques of both kinds of adhering junctions, the desmosomes and the intermediate junctions. It is a component of the cadherin-catenin complex, which is predominantly localized where actin filaments anchor in adherens junctions of epithelial cells. The human plakoglobin gene localizes on chromosome 17q21. Gamma-catenin is regulated by the APC tumor suppressor and its oncogenic activity is

distinct from that of beta-catenin.

Synonyms: Desmoplakin-3, Desmoplakin III, Catenin gamma, JUP, CTNNG, DP3

**Protein Families:** Druggable Genome

Protein Pathways: Acute myeloid leukemia, Arrhythmogenic right ventricular cardiomyopathy (ARVC), Pathways

in cancer
