Product datasheet for AP26453RP-N

Mannose Receptor (MRC1) Mouse Monoclonal Antibody [Clone ID: 15-2]

Product data:

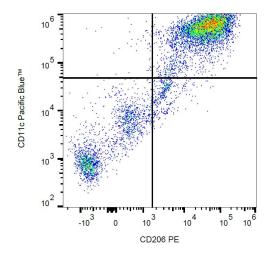

Product Type:	Primary Antibodies
Clone Name:	15-2
Applications:	FC
Recommended Dilution:	Flow Cytometry analysis of human blood cells using 10 μl reagent / 100 μl of whole blood or 10 ⁶ cells in a suspension. The content of a vial (1 ml) is sufficient for 100 tests.
Peactivity	Human
Reactivity: Host:	Mouse
lsotype:	lgG1
Clonality:	Monoclonal
Immunogen:	Purified human mannose receptor
Specificity:	This antibody antibody clone 15-2 (also known as MR15-2) recognizes CD206 (macrophage mannose receptor, MMR), a 162-175 kDa type I transmembrane protein expressed mainly on macrophages, dendritic cells and hepatic or lymphatic endothelial cells, but not on monocytes.
Formulation:	Phosphate buffered saline (PBS) containing 15 mM sodium azide and 0.2% (w/v) high-grade protease free Bovine Serum Albumin (BSA) as a stabilizing agent. Label: PE State: Liquid purified Ig fraction Label: Conjugated with R-Phycoerythrin (PE) under optimum conditions. The conjugate is purified by size-exclusion chromatography and adjusted for direct use.
Conjugation:	PE
Storage:	Store the antibody undiluted at 2-8°C. DO NOT FREEZE! This product is photosensitive and should be protected from light.
Stability:	Shelf life: one year from despatch.
Gene Name:	mannose receptor, C type 1
Database Link:	<u>Entrez Gene 4360 Human</u> <u>P22897</u>

	Mannose Receptor (MRC1) Mouse Monoclonal Antibody [Clone ID: 15-2] – AP26453RP-N
Background:	CD206 (macrophage mannose receptor, MMR), also known as mannose receptor C1 (MRC1), is a type I transmembrane glycoprotein serving as pattern recognition receptor for carbogydrate groups on the surface of bacteria, fungi and other pathogens. Expressed mainly on tissue macrophages and dendritic cells, CD206 mediates endocytosis of these pathogens and presentation of their antigens to the adaptive immune system. CD206 can also be detected in a soluble form in human plasma and is elevated in patients with acute sepsis.
Synonyms:	Macrophage mannose receptor, CLEC13D, CLEC13DL, MRC1L1

Product images:

Surface staining of CD206 on human peripheral blood-derived dendritic cells with anti-CD206 (15-2) PE.
