# Product datasheet for AP31103PU-N

### ITIH4 (890-903) Goat Polyclonal Antibody

#### **Product data:**

Product Type:	Primary Antibodies	
Applications:	ELISA, IHC, WB	
Recommended Dilution:	<b>Peptide ELISA:</b> Detection Limit: 1/16000. <b>Western Blot:</b> 0.03-0.1 μg/ml. In Human Placenta lysates, a band of ~150kDa is detected corresponding to the glycosylated form. <b>Immunohistochemistry on Paraffin Sections.</b>	
Reactivity:	Human	
Host:	Goat	
Clonality:	Polyclonal	
Immunogen:	Peptide with sequence from the C Terminus of the protein sequence according to NP_002209.2 and NP_001159921.1.	
Specificity:	This antibody is expected to recognize both reported isoforms (NP_002209.2, NP_001159921.1).	
Formulation:	Tris saline, pH~7.3 with 0.02% Sodium Azide and 0.5% BSA State: Aff - Purified State: Liquid purified Ig fraction	
Concentration:	lot specific	
Purification:	Ammonium Sulphate Precipitation followed by Antigen Affinity Chromatography using the immunizing peptide	
Conjugation:	Unconjugated	
Storage:	Store the antibody undiluted at 2-8°C for one month or (in aliquots) at -20°C for longer. Avoid repeated freezing and thawing.	
Stability:	Shelf life: one year from despatch.	
Gene Name:	inter-alpha-trypsin inhibitor heavy chain family member 4	
Database Link:	<u>Entrez Gene 3700 Human</u> <u>Q14624</u>

	ITIH4 (890-903) Goat Polyclonal Antibody – AP31103PU-N
Background:	The inter-a-trypsin inhibitor (ITI, IaI) family, a typical and classical example for protein- glycosaminoglycanprotein (PGP) complexes, occurs constitutively in plasma at relatively high concentrations and is a result of alternate combinations of three kinds of heavy chains with a common light chain, the bikunin proteoglycan. Bikunin has two proteinase inhibitor domains and belongs to the Kunitz-type protease inhibitor family; it displays an inhibitory activity against trypsin, leukocyte elastase and plasmin. The heavy chains do not have any protease inhibitory properties but have the capacity to interact in vitro and in vivo with hyaluronic acid and this binding promotes the stability of the extra-cellular matrix. The ITI protein family is suspected of playing a key role in the extra-cellular matrix biology.
Synonyms:	ITI heavy chain H4, IHRP, ITIHL1, PK120, ITI-HC4, Gp120
Note:	Calculated Molecular Weight: 103kDa (NP_002209.2).
