Product Type:	Primary Antibodies
Applications:	FC, WB
Recommended Dilution:	<b>Western Blot:</b> 2-5 μg/ml. <b>Flow Cytometry:</b> 1-5 μg/ml.
Reactivity:	Mouse
Host:	Rabbit
lsotype:	IgG
Clonality:	Polyclonal
Immunogen:	Highly pure (>95%) recombinant Mouse soluble TIE-2 (Ala23-Ala737) derived from Insect cells.
Specificity:	Recognizes TIE-2 (CD202b/TEK)
Formulation:	PBS, pH 7.2 State: Purified State: Liquid purified IgG fraction
Purification:	Protein A Chromatography
Conjugation:	Unconjugated
Storage:	Store lyophilized at 2-8°C for 6 months or at -20°C long term. After reconstitution store the antibody undiluted at 2-8°C for one month or (in aliquots) at -20°C long term. Avoid repeated freezing and thawing.
Stability:	Shelf life: one year from despatch.
Gene Name:	endothelial-specific receptor tyrosine kinase
Database Link:	Entrez Gene 21687 Mouse Q02858

#### **CD202b / TEK Rabbit Polyclonal Antibody – AP31728PU-N**

Background:Recombinant Mouse soluble TIE-1 was fused with a 6x His-tag at the C-terminus. The soluble<br/>receptor protein consists of the full extracellular domain (Ser22-Ala748). Mouse sTIE-1<br/>monomer has a calculated molecular mass of approximately 79,8 kDa. As a result of<br/>glycosylation, the recombinant protein migrates as an approximately 95 kDa protein in SDS-<br/>PAGE under reducing conditions. TIE-1 (tyrosine kinase with Ig and EGF homology domains 1)<br/>and TIE-2/Tek comprise a receptor tyrosine kinase (RTK) subfamily with unique structural<br/>characteristics: two immunoglobulin-like domains flanking three epidermal growth factor<br/>(EGF)-like domains and followed by three fibronectin type III-like repeats in the extracellular<br/>region and a split tyrosine kinase domain in the cytoplasmic region.<br/>These receptors are expressed primarily on endothelial and hematopoietic progenitor cells<br/>and play critical roles in angiogenesis, vasculogenesis and hematopoiesis.

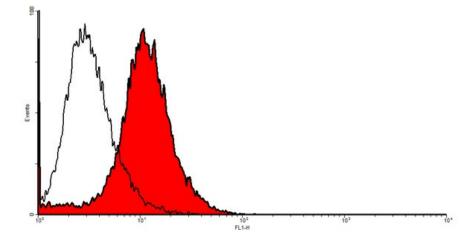

Synonyms:

TIE2, TIE-2, Angiopoietin-1 receptor, p140 TEK

### **Product images:**

Western analysis of recombinant Human and Mouse sTIE-1 and sTIE-2 with a Polyclonal antibody directed against Mouse recombinant sTIE-2. There is a very weak cross reactivity with Human sTIE-2 but not with Human and Mouse sTIE-1 visible.

FACS analysis of TIE-2 expression in primary mouse endothelial cells (SnoMec).
