

Product datasheet for AP31736PU-N

Factor IX (F9) Sheep Polyclonal Antibody

Product data:

OriGene Technologies, Inc.

9620 Medical Center Drive, Ste 200 Rockville, MD 20850, US Phone: +1-888-267-4436 https://www.origene.com techsupport@origene.com EU: info-de@origene.com CN: techsupport@origene.cn

Product Type:	Primary Antibodies
Applications:	ELISA, IHC, Neutralize
Recommended Dilution:	ELISA. Immunohistochemistry on Paraffin Sections: 2.5 μg/ml. Neut.
Reactivity:	Human
Host:	Sheep
lsotype:	lgG
Clonality:	Polyclonal
Immunogen:	Human Factor IX purified from plasma.
Specificity:	Specific for FIX as analyzed by Immunoelectrophoresis and ELISA.
Formulation:	10 mM HEPES, pH 7.4, 0.15 M Sodium Chloride, 50% Glycerol State: Aff - Purified State: Liquid purified lg fraction
Concentration:	lot specific
Purification:	Immunoaffinity Chromatography
Conjugation:	Unconjugated
Storage:	Store undiluted at 2-8°C for one month or (in aliquots) at -20°C for longer. Avoid repeated freezing and thawing.
Stability:	Shelf life: one year from despatch.
Gene Name:	coagulation factor IX
Database Link:	<u>Entrez Gene 2158 Human</u> <u>P00740</u>

	Factor IX (F9) Sheep Polyclonal Antibody – AP31736PU-N
Background:	Coagulation Factor IX (F9) circulates in the blood as an inactive zymogen. This factor is converted to an active form by factor XIa, which excises the activation peptide and thus generates a heavy chain and a light chain held together by one or more disulfide bonds. The role of this activated factor IX in the blood coagulation cascade is to activate factor X to its active form through interactions with Ca+2 ions, membrane phospholipids, and factor VIII. Alterations of this gene, including point mutations, insertions and deletions, cause factor IX deficiency, which is a recessive X-linked disorder, also called hemophilia B or Christmas disease.
Synonyms: Protein Familie	Christmas factor, PTC s: Druggable Genome, Protease, Secreted Protein

Protein Pathways: Complement and coagulation cascades
