Product Type:	Primary Antibodies
Applications:	IP
Recommended Dilution:	The cytochemical grade allows the use in different types of highly sensitive immunoassays on appropriately treated cell and tissue substrates; in radioimmunoassay; for the production of immunoconjugates with a selected marker; to prepare immunoaffinity adsorbents by coupling to an artificial carrier; in non-isotopic methodology based on solid phase immunochemistry (e. g. ELISA), both as catching antibody and detection reagent; in Western blotting. This product is not pre-diluted. <i>Recommended Working Dilutions</i> : Histochemical and cytochemical use: 1/100-1/250 ELISA and comparable non-precipitating antibody-binding assays: 1/500-1/5000.
Reactivity:	Human
Host:	Rabbit
Clonality:	Polyclonal
Immunogen:	Highly purified lysozyme is isolated from pooled milk. Freund's complete adjuvant is used in the first step of the immunization procedure.
Specificity:	The reactivity of the antiserum is restricted to lysozyme. In immunoelectrophoresis and radial immunodiffusion (Ouchterlony), using various antiserum concentrations against normal human milk and tears a single precipitin line is obtained which shows a reaction of identity with the precipitin line obtained with purified lysozyme. No reaction is obtained with any other plasma protein component or serum. <b>Cross-reactivity:</b> The antiserum does not cross-react with any other component of human plasma. Inter-species cross- reactivity is a normal feature of antibodies to plasma proteins since they frequently share antigenic determinants. Cross-reactivity of this antiserum has not been tested in detail.
Formulation:	PBS, pH 7.2 State: Serum State: Lyophilized Serum Stabilizer: None Preservative: None
Reconstitution Method:	Restore by adding 1 ml sterile di stilled water

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2024 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

	LYZ Rabbit Polyclonal Antibody – AP32827SU-N
Conjugation:	Unconjugated
Storage:	Prior to reconstitution store at 2-8°C. Following reconstitution store undiluted at 2-8°C for one month or (in aliquots) at -20°C for longer. Avoid repeated freezing and thawing.
Stability:	Shelf life: one year from despatch.
Gene Name:	lysozyme (renal amyloidosis)
Database Link:	<u>Entrez Gene 396218 Chicken</u> <u>P00698</u>
Background:	Lysozyme, a bacteriolytic enzyme, has a molecular weight of about 15,000. Its concentration in plasma is low; in milk the concentration is reported to be between 5 and 220 mg/ml. Also tears contain a considerable amount of lysozyme.
Synonyms:	LYZ, LZM
