

## Product datasheet for **AP32988SU-N**

### Erythrocytes Rabbit Polyclonal Antibody

#### Product data:

Product Type:	Primary Antibodies
Applications:	IP
Recommended Dilution:	<b>Immunoprecipitation.</b> Haemolytic titre, at which 50% lysis occurs following mixing of equal volumes of antiserum, Guinea Pig complement (at a 1/60 dilution) and 2% RBC, not less than 1/500 when tested with Bovine Erythrocytes.
Reactivity:	Bovine
Host:	Rabbit
Clonality:	Polyclonal
Immunogen:	Washed whole Erythrocytes were prepared from fresh blood and used for intravenous immunization. Freund's complete adjuvant is used in the first step of the immunization procedure.
Specificity:	Bovine Erythrocytes. To sensitize cells in Haemolytic complement assays and for screening of T and T receptor-bearing lymphocytes. Homologous proteins of different species frequently share antigenic determinants. Cross-reactivity has not been tested.
Formulation:	State: Serum State: Lyophilized (Delipidated, heat inactivated) stable whole antiserum
Reconstitution Method:	Restore by adding 1.0 ml of sterile distilled water
Conjugation:	Unconjugated
Storage:	Store lyophilized at 2-8°C for 6 months or at -20°C long term. After reconstitution store the antibody undiluted at 2-8°C for one month or (in aliquots) at -20°C long term. Avoid repeated freezing and thawing.
Stability:	Shelf life: one year from despatch.
Note:	Total protein and IgG concentrations in the antiserum are comparable to those in pooled rabbit serum.
