Guinea Pig IgM (Fc specific) Sheep Polyclonal Antibody

Product data:

Product Type: Secondary Antibodies

Product Name: Guinea Pig IgM (Fc specific) Sheep Polyclonal Antibody

Applications: ID, IP

Recommended Dilution: Immunoprecipitation.

Can be used in precipitating techniques as immunoelectrophoresis and radial

immunodiffusion to identify the presence of IgM in guinea pig serum and other body fluids or to determine its concentration. To prepare an immunoadsorbent for the purification of

guinea pig IgM from serum or plasma.

Directions for Use:

Immunoelectrophoresis: Use 2 μ l or equivalent against 120 μ l antiserum.

Double Radial Immunodiffusion use a rosette arrangement with 10 μ l antiserum in a 3 mm diameter centre well and 2 μ l serum samples (neat and diluted) in 2 mm diameter peripheral

wells.

Antibody titre: Precipitin titre not less than 1/32 when tested against normal guinea pig serum

in agar block titration.

Reactivity: Guinea Pig

Host: Sheep

Immunogen: Highly purified normal IgM isolated from pooled guinea pig serum.

Freund's complete adjuvant is used in the first step of the immunization procedure.

Formulation: State: Serum

State: Lyophilized (delipidated, heat inactivated) stable whole antiserum without preservatives

Reconstitution Method: Restore by adding 1 ml of sterile distilled water

Concentration: Total protein and IgG concentrations in the antiserum are comparable to those of pooled

normal sheep serum. No foreign proteins added.

Conjugation: Unconjugated

Storage: Store lyophilized at 2-8°C for 6 months or at -20°C long term.

After reconstitution store the antibody undiluted at 2-8°C for one month

or (in aliquots) at -20°C long term. Avoid repeated freezing and thawing.

Note:

Adsorption: Immunoaffinity adsorbed using insolubilized antigens as required, to eliminate antibodies cross-reacting with other components of the immunoglobulin system or reacting with other serum proteins. The use of insolubilized adsorption antigens prevents the presence of excess adsorbent protein or immune complexes in the antiserum.
