Product datasheet for AP33203SU-N

ADFP (PLIN2) (N-term, 6-27) Guinea Pig Polyclonal Antibody

Product data:

| Product Type: | Primary Antibodies |
|-----------------------|---|
| Applications: | IHC, WB |
| Recommended Dilution: | Immunoblotting (Western blot): 1/2000. Immunohistochemistry on Frozen Sections: 1/100. Immunohistochemistry on Paraffin Sections: 1/100 (after microwave treatment). For staining protocol see Ohsaki et al. Cytological Material. Incubation Time: 1 h at room temperature or overnight at 2-8°C. |
| Reactivity: | Human, Mouse |
| Host: | Guinea Pig |
| Clonality: | Polyclonal |
| Immunogen: | Synthetic peptide (N-terminal aa 6-27 of Human Adipophilin). |
| Specificity: | Specific for Adipophilin / ADRP / PLIN2, MW 48,100 (calculated from aa sequence data); apparent Mr 52,000 (after SDS-PAGE); pl 6.72. Tissue Immunolocalization: Adipophilin / PLIN2 is positively detected in the glandular cells of lactating mammary gland (ductal cells are negative), zona fasciculata of the adrenal gland, Sertoli cells of the testis, and in fat-accumulating hepatocytes of alcoholic cirrhotic fatty liver; adipocytes are negative. Also positively stained are lipid-storing CD 68-positive macrophages. Tested Reactivities on Cultured Cell Lines: PLC. |
| Formulation: | State: Serum State: Liquid Stabilized Antiserum Preservative: 0.09% Sodium Azide |
| Conjugation: | Unconjugated |
| Storage: | Store the antibody undiluted at 2-8°C. |
| Stability: | Shelf life: one year from despatch. |
| Gene Name: | perilipin 2 |
| Database Link: | <u>Entrez Gene 11520 MouseEntrez Gene 101055843 MouseEntrez Gene 123 Human</u> <u>Q99541</u> |

| | ADFP (PLIN2) (N-term, 6-27) Guinea Pig Polyclonal Antibody – AP33203SU-N |
|-------------------------------|--|
| Background: | Adipophilin / ADRP (a member of the PAT family) is a ubiquitous component of lipid droplets. It has been found in milk fat globule membranes and on the surface of lipid droplets in various cultured cell lines (see e.g. Heid et al.; for review see e.g. Targett-Adams et al.); inducible by etomoxir. Enhanced expression of Adipophilin / ADRP is a useful marker for pathologies characterized by increased lipid droplet accumulation. Such diseases include atheroma, steatosis, obesity and certain cases of liposarcoma. It also seems to be a potent marker for atherosclerosis. ADRP can also be used to study the virus entry of e.g. HCV via lipid droplets (see e.g. Hope et al.). |
| Synonyms: Protein Families | Adipose differentiation-related protein, ADRP Druggable Genome |
