	Claudin 2 (CLDN2) (C-term Y224) Rabbit Polyclonal Antibody – AP50946PU-N
Background:	This gene product belongs to the claudin protein family whose members have been identified as major integral membrane proteins localized exclusively at tight junctions. Claudins are expressed in an organ-specific manner and regulate tissue-specific physiologic properties of tight junctions. This protein is expressed in the intestine. Alternatively spliced transcript variants with different 5' untranslated region have been found for this gene.
Synonyms:	SP82, CLD2
Protein Families	: Transmembrane
Protein Pathway	<b>vs:</b> Cell adhesion molecules (CAMs), Leukocyte transendothelial migration, Tight junction
