Product datasheet for AP55750PU-S

ALK pTyr1096 Rabbit Polyclonal Antibody

Product data:

| Product Type: | Primary Antibodies |
|-------------------------|---|
| Applications: | IHC |
| Recommended Dilution: | Immunohistochemistry on paraffin sections: 1:50~1:100. |
| Reactivity: | Human, Mouse |
| Host: | Rabbit |
| Clonality: | Polyclonal |
| Immunogen: | Peptide sequence around phosphorylation site of tyrosine 1096 (P-N-Y(p)-C-F) derived from Human ALK (KLH-conjugated) |
| Specificity: | The antibody detects endogenous levels of ALK only when phosphorylated at tyrosine 1096. |
| Formulation: | Rabbit IgG in phosphate buffered saline (without Mg2+ and Ca2+), pH 7.4, 150mM NaCl, 0.02% sodium azide and 50% glycerol State: Aff - Purified State: Liquid Ig fraction |
| Concentration: | lot specific |
| Purification: | Affinity chromatography using epitope-specific peptide |
| Conjugation: | Unconjugated |
| Storage: | Upon receipt, store undiluted (in aliquots) at -20°C. Avoid repeated freezing and thawing. |
| Stability: | Shelf life: one year from despatch. |
| Predicted Protein Size: | 167 kDa |
| Gene Name: | anaplastic lymphoma receptor tyrosine kinase |
| Database Link: | <u>Entrez Gene 238 Human</u> <u>Q9UM73</u> |

| | ALK pTyr1096 Rabbit Polyclonal Antibody – AP55750PU-S |
|-------------|--|
| Background: | The 2;5 chromosomal translocation is frequently associated with anaplastic large cell lymphomas (ALCLs). The translocation creates a fusion gene consisting of the ALK (anaplastic lymphoma kinase) gene and the nucleophosmin (NPM) gene: the 3' half of ALK, derived from chromosome 2, is fused to the 5' portion of NPM from chromosome 5. A recent study shows that the product of the NPM-ALK fusion gene is oncogenic. The deduced amino acid sequences reveal that ALK is a novel receptor protein-tyrosine kinase having a putative transmembrane domain and an extracellular domain. |

Synonyms:

ALK tyrosine kinase receptor
