CDC25C pSer198 Rabbit Polyclonal Antibody - AP55808PU-NBackground:cdc25C is highly conserved during evolution and it plays a key role in the regulation of cell
division. The encoded protein is a tyrosine phosphatase and belongs to the Cdc25
phosphatase family. It directs dephosphorylation of cyclin B-bound CDC2 and triggers entry
into mitosis. It is also thought to suppress p53-induced growth arrest. Multiple alternatively
spliced transcript variants of this gene have been described, however, the full-length nature
of many of them is not known.

Synonyms: CDC25
