### **GRIGENE** Cyclin C (CCNC) pSer275 Rabbit Polyclonal Antibody – AP55815PU-N

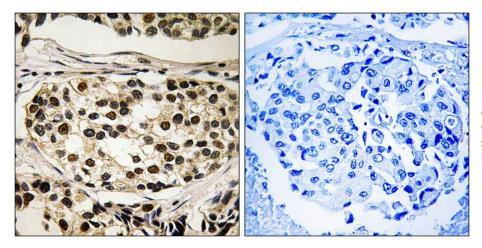

Background:The protein encoded by this gene is a member of the cyclin family of proteins. The encoded<br/>protein interacts with cyclin-dependent kinase 8 and induces the phophorylation of the<br/>carboxy-terminal domain of the large subunit of RNA polymerase II. The level of mRNAs for<br/>this gene peaks in the G1 phase of the cell cycle. Two transcript variants encoding different<br/>isoforms have been found for this gene.

Synonyms: Cyclin-C, hSRB11, CCNC, SRB11 homolog
