

Product datasheet for AP55844PU-N

VAV3 pTyr173 Rabbit Polyclonal Antibody

Product data:

Product Type: Primary Antibodies

Applications:

Recommended Dilution: Western blot: 1:500~1:1000.

Reactivity: Human, Mouse

Rabbit Host:

Clonality: Polyclonal

Peptide sequence around phosphorylation site of tyrosine 173 (E-V-Y(p)-E-D) derived from Immunogen:

Human VAV3 (KLH-conjugated)

Specificity: The antibody detects endogenous levels of VAV3 only when phosphorylated at tyrosine 173.

Formulation: Rabbit IgG in phosphate buffered saline (without Mg2+ and Ca2+), pH 7.4, 150mM NaCl,

0.02% sodium azide and 50% glycerol

State: Aff - Purified State: Liquid Ig fraction

Concentration: lot specific

Purification: Affinity chromatography using epitope-specific peptide

Conjugation: Unconjugated

Storage: Upon receipt, store undiluted (in aliquots) at -20°C.

Avoid repeated freezing and thawing.

Stability: Shelf life: one year from despatch.

Predicted Protein Size: 100 kDa

Gene Name: vav guanine nucleotide exchange factor 3

Database Link: Entrez Gene 10451 Human

VAV3 pTyr173 Rabbit Polyclonal Antibody - AP55844PU-N

Background:

This gene is a member of the VAV gene family. The VAV proteins are guanine nucleotide exchange factors (GEFs) for Rho family GTPases that activate pathways leading to actin cytoskeletal rearrangements and transcriptional alterations. This gene product acts as a GEF preferentially for RhoG, RhoA, and to a lesser extent, RAC1, and it associates maximally with the nucleotide-free states of these GTPases. Alternatively spliced transcript variants encoding different isoforms have been described for this gene.

Synonyms: VAV-3
