

Product datasheet for AR08012AG-N

GST-Tag Protein

Product data:

Product Type: Recombinant Proteins Description: GST-Tag protein, 20 mg Agarose **Conjugation: Buffer:** State: Suspension of agarose beads Buffer System: 0.02M Potassium Phosphate, 0.15M Sodium Chloride, pH 7.2 Preservative: 0.01% (w/v) Sodium Azide Stabilizer: None Presentation Label: Agarose **Preparation:** Suspension of agarose beads **Applications:** Suitable for molecular biology, enzyme purification or to remove unwanted cross-reactivity. **Protein Description:** This product is purified GST protein coupled to activated agarose. Sufficient capacity is provided to bind a minimum of 5 mg of anti-GST activity in a purified antibody or antiserum. Store undiluted at 2-8°C. Storage: **DO NOT FREEZE!** Stability: Shelf life: one year from despatch. Summary: GST (Glutathione S-Transferase) is a 26kDa protein encoded by the parasitic helminth Schistosoma japonicum and widely used in the pGEX family of GST plasmid expression vectors as a fusion protein with foreign proteins.
