### IFNG / Interferon gamma Human Protein

**Product data:** 

**Product Type: Recombinant Proteins** 

**Description:** IFNG / Interferon gamma human recombinant protein, 0.5 mg

Species: Human E. coli **Expression Host:** 

**Expression cDNA Clone** 

MQDPYVKEAE NLKKYFNAGH SDVADNGTLF LGILKNWKEE SDRKIMQSQI VSFYFKLFKN or AA Sequence: FKDDQSIQKS VETIKEDMNV KFFNSNKKKR DDFEKLTNYS VTDLNVQRKA IHELIQVMAE

LSPAAKTGKR KRSQMLFRGR RASQ

Predicted MW: 16.9 kDa Concentration: lot specific

**Purity:** >95% pure by SDS-PAGE

**Buffer:** Presentation State: Purified

State: Liquid purified protein

Buffer System: PBS, pH 7.4 containing 10% Glycerol

Biological: Measured in a cytotoxicity assay using WiDr cells. The ED50 for this effect is ≤ 5 **Bioactivity:** 

ng/ml.

**Endotoxin:** < 1.0 EU per 1 µg of Protein (determined by LAL method).

**Preparation:** Liquid purified protein

Recombinant Human interferon-y was expressed in *E.coli* and purified by FPLC gel-filtration **Protein Description:** 

chromatography, after refolding of the isolated inclusion bodies in a renaturation buffer.

Additional amino acid (Methionine) is attached at N-terminus.

Store undiluted at 2-8°C for one month or (in aliquots) at -20°C to -80°C for longer. Storage:

Avoid repeated freezing and thawing.

Stability: Shelf life: one year from despatch.

RefSeq: NP 000610

Locus ID: 3458 **UniProt ID:** P01579 Cytogenetics: 12q15

#### IFNG / Interferon gamma Human Protein - AR09041PU-L

Synonyms: IFN-gamma, gamma IFN

**Summary:** This gene encodes a soluble cytokine that is a member of the type II interferon class. The

encoded protein is secreted by cells of both the innate and adaptive immune systems. The active protein is a homodimer that binds to the interferon gamma receptor which triggers a cellular response to viral and microbial infections. Mutations in this gene are associated with

an increased susceptibility to viral, bacterial and parasitic infections and to several

autoimmune diseases. [provided by RefSeq, Dec 2015]

**Protein Families:** Druggable Genome, Secreted Protein

**Protein Pathways:** Allograft rejection, Cytokine-cytokine receptor interaction, Graft-versus-host disease, Jak-STAT

signaling pathway, Natural killer cell mediated cytotoxicity, Proteasome, Regulation of autophagy, Systemic lupus erythematosus, T cell receptor signaling pathway, TGF-beta

signaling pathway, Type I diabetes mellitus
