	VAMP-7 / SYBL1 (1-188, His-tag) Human Protein – AR50510PU-N
Summary:	This gene encodes a transmembrane protein that is a member of the soluble N- ethylmaleimide-sensitive factor attachment protein receptor (SNARE) family. The encoded protein localizes to late endosomes and lysosomes and is involved in the fusion of transpor vesicles to their target membranes. Alternate splicing results in multiple transcript variants. [provided by RefSeq, Jun 2010]
Protein Familie	es: Transcription Factors, Transmembrane
Protein Pathw	avs: SNARE interactions in vesicular transport
