### SM1 (20-184, His-tag) Human Protein – AR50688PU-N

Summary:This gene encodes a secreted protein which is mainly expressed in the endothelial cells in<br/>human lung and kidney tissues. The expression of this gene is regulated by cytokines,<br/>suggesting that it may play a role in endothelium-dependent pathological disorders. The<br/>transcript contains multiple polyadenylation and mRNA instability signals. Two transcript<br/>variants encoding different isoforms have been found for this gene. [provided by RefSeq, Oct<br/>2008]

Protein Families: Druggable Genome, Secreted Protein
