	JAZF1 / ZNF802 (1-243, His-tag) Human Protein – AR50896PU-S
Summary:	This gene encodes a nuclear protein with three C2H2-type zinc fingers, and functions as a transcriptional repressor. Chromosomal aberrations involving this gene are associated with endometrial stromal tumors. Alternatively spliced variants which encode different protein isoforms have been described; however, not all variants have been fully characterized [provided by RefSeq, Jul 2008]
Protein Familie	Druggable Genome, Transcription Factors
