

Product datasheet for BA662

Streptavidin Protein

Product data:

Product Type: Native Proteins

Description: Streptavidin protein, 5 mg

Protein Source: S. avidinii Predicted MW: 53 kDa

Purity: >95% pure (SDS-PAGE)

Buffer: Presentation State: Purified

State: Lyophilized Streptavidin from *Streptomyces avidinii* (Essentially salt free)

Buffer System: PBS

Preservative: 1% Mannitol Stabilizer: 1% Dextran

Bioactivity: Biological: One unit will bind 1 µg of D-Biotin.

Specific: 17 U/mg Streptavidin

Reconstitution Method: Restore with distilled water or saline.

Care should be taken during reconstitution as the protein may appear as a film at the bottom

of the vial. We recommend that the vial is gently mixed after reconstitution.

Preparation: Lyophilized Streptavidin from Streptomyces avidinii (Essentially salt free)

Can be used for biotinylated antibody detection and quantification by ELISA, blotting and **Applications:**

immunohistology; as a ligand for immobilization on activated matrices.

Purified Streptavidin prepared by Affinity Chromatography **Protein Description:**

Note: pl: 5

Store lyophilized at 2-8°C for 6 months or at -20°C long term. Storage:

After reconstitution store the antibody undiluted at 2-8°C for one month

or (in aliquots) at -20°C long term. Avoid repeated freezing and thawing.

Stability: Shelf life: one year from despatch.

Summary: Streptavidin is a tetrameric protein purified from Streptomyces sp. that binds very tightly to

> the vitamin biotin with a Kd of ~ 10-14 mol/l. The high affinity recognition of biotin and biotinylated molecules has made streptavidin one of the most important components in

diagnostics and laboratory kits.
