

## Product datasheet for **BIN093**

### Hepatitis B Surface Antigen / HBsAg (adr) Protein

#### Product data:

<b>Product Type:</b>	Recombinant Proteins
<b>Description:</b>	Hepatitis B Surface Antigen / HBsAg (adr) recombinant protein, 0.5 mg
<b>Expression Host:</b>	<i>S. cerevisiae</i>
<b>Concentration:</b>	lot specific
<b>Purity:</b>	>98% Ion exchange chromatography. Product is sterile filtered.
<b>Buffer:</b>	Presentation State: Purified State: Liquid purified Ig fraction (>95% pure by HPLC). Buffer System: 10 mM Phosphate and 145 mM Sodium Chloride as buffer, containing 0.09% Sodium Azide as preservative.
<b>Preparation:</b>	Liquid purified Ig fraction (>95% pure by HPLC).
<b>Applications:</b>	Suitable for use in ELISA (capture and conjugate), Immunochromatography (capture and conjugate) and Immunogen for monoclonal antibody production. Tested in ELISA with anti HBsAg antibodies.
<b>Protein Description:</b>	Recombinant Hepatitis B Surface Antigen (HBsAg),(adr)(S Region). Recombinant HBsAg is a 24 kDa protein. Does not contain a fusion partner.
<b>Storage:</b>	Store the antigen at 2-8°C for one month or (in aliquots) at -20°C for longer. Avoid multiple freeze/thaw cycles.
<b>Stability:</b>	Shelf life: six months from despatch.
<b>Synonyms:</b>	HBV surface antigen, Hepatitis B Virus
<b>Summary:</b>	Hepatitis B Virus (HBV) infection induces a disease state which manifests itself in a variety of ways, characterized by the extent of liver damage, inflammation and viral persistence. HBV infection is also associated with a 100 fold increased risk of hepatocellular carcinoma and currently infects over 250 million people worldwide. HBV has a partially double stranded 3.2 kilobase DNA genome which contains four open reading frames. One of these encodes a 154 amino acid protein called the HBx protein. HBx has been shown to be a transcriptional transactivator of both viral and cellular promoters. Lacking a DNA binding domain and nuclear localization signal, HBx is believed to exert transcriptional activity through protein protein interaction.
