Product datasheet for BM2577

Apolipoprotein A I (APOA1) Mouse Monoclonal Antibody [Clone ID: 1405]

Product data:

Product Type:	Primary Antibodies
Clone Name:	1405
Applications:	ELISA, R
Recommended Dilution:	Suitable for use in Competitive RIA or EIA.
Reactivity:	Human
Host:	Mouse
lsotype:	lgG1
Clonality:	Monoclonal
Immunogen:	Purified Human plasma Apo A-I
Specificity:	Recognizes Apolipoprotein A1 (Apo Al). No cross reactivity with Apo A-II or Apo B.
Formulation:	PBS, pH 7.0 containing 0.02% Sodium Azide as preservative. State: Purified State: Liquid purified IgG fraction.
Concentration:	lot specific
Purification:	Protein A Chromatography.
Conjugation:	Unconjugated
Storage:	Store the antibody undiluted at 2-8°C for one mounth or (in aliquots) at -20°C for longer. Avoid repeated freezing and thawing.
Stability:	Shelf life: one year from despatch.
Gene Name:	apolipoprotein A1
Database Link:	<u>Entrez Gene 335 Human</u> <u>P02647</u>

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2024 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

	Apolipoprotein A I (APOA1) Mouse Monoclonal Antibody [Clone ID: 1405] – BM2577
Background:	Apolipoprotein A I promotes cholesterol efflux from tissues to the liver for excretion. Apolipoprotein A I is the major protein component of high density lipoprotein (HDL) in the plasma. Synthesized in the liver and small intestine, it consists of two identical chains of 77 amino acids; an 18 amino acid signal peptide is removed co-translationally and a 6 amino acid propeptide is cleaved post-translationally. Apolipoprotein A I is a cofactor for lecithin cholesterolacyltransferase (LCAT) which is responsible for the formation of most plasma cholesteryl esters. Defects in the Apolipoprotein A I gene are associated with HDL deficiency and Tangier disease. The therapeutic potential of apoA-I has been recently assessed in patients with acute coronary syndromes, using a recombinant form of a naturally occurring variant of apoA-I. The availability of recombinant normal apoA-I should facilitate further investigation into the potential usefulness of apoA-I in preventing atherosclerotic vascular diseases.
Synonyms:	APOA1, ApoA-I, Apo-AI, ApoAI
