Hepatitis B Core Antigen / HBcAg (ayw) Mouse Monoclonal Antibody [Clone ID: 14E11]

Product data:

Product Type: Primary Antibodies

Clone Name: 14E11

Applications: ELISA, IHC, IP, WB

Recommended Dilution: Suitable for use in ELISA, Western blot, IHC and Immunoprecipitation of in vitro-translated

core and pre-core proteins.

Reactivity: Hepatitis B Virus

Host: Mouse Isotype: IgG2a

Clonality: Monoclonal

Specificity: This antibody detects HBcAg core antigen.

Produced against recombinant HBcAg core antigen (ayw).

Reacts with synthetic HBc peptides.

Strongly recognizes WHc (but not DHBc) in ELISA and Immunoblot.

Formulation: PBS, pH 7.4 containing 0.01% sodium azide as preservative.

State: Ascites

State: Liquid diluted ascites

Concentration: lot specific

Conjugation: Unconjugated

Storage: Store the antibody at 2-8°C for one month or at -20°C for longer.

Avoid repeated freezing and thawing.

Stability: Shelf life: one year from despatch.

Background: Hepatitis B Virus Core Antigen (HBcAg) is part of the infectious virion containing an inner

"core particle" enclosing the viral genome. The icosahedral core particle contains 180 or 240 copies of the core protein. HBcAg is one of the three major clinical antigens of hepatitis B

virus but disappears early in the course of infection.

The hepatitis B virus core antigen (HBcAg) is a highly immunogenic subviral particle and functions as both a T-cell-dependent and a T-cell-independent antigen. Therefore, HBcAg may be a promising candidate target for therapeutic vaccine control of chronic HBV infection.

Synonyms: HBV Capsid protein, HBV Core protein, p21.5
