Collagen type I Rabbit Polyclonal Antibody

Product data:

Product Type: Primary Antibodies

Applications: ELISA, IF, IHC, R

Recommended Dilution: ELISA.

RIA: 1/1000.

Immunfluorescence: 1/40-1/80.

Immunohistochemistry on Frozen Sections.

Immunohistochemistry on Paraffin Sections: 1/500-1/1000.

Incubation time: 60 min at RT or 2-8°C overnight.

Positive Control: Chicken skin.

Pretreatment: After de-waxing the tissue slices they are treated with 0.2% hyaluronidase (app. 300 U/mg) in TBS 15 min at 37°C. There after non-specific binding is blocked by blocking serum or 3% BSA in TBS. For peroxidase systems blocking with 1% peroxide solution in TBS

for 30 min at RT is recommended.

Reactivity: Chicken

Host: Rabbit

Clonality: Polyclonal

Immunogen: Purified collagen type I from chicken skin

Specificity: Chicken Collagen type I: 100%.

Chicken Collagen type III and IV: < 0.1 %.

Collagen type I Human, Mouse, Rat, Cattle: < 0.1 %. Chicken Fibronectin: < 0.1 % RIA at 1/1000 dilution.

Formulation: State: Purified

State: Lyophilized purified IgG fraction

Reconstitution Method: Restore by adding 0.1 ml aqua destilled, for further dilution use appropriate antibody diluent.

Concentration: lot specific

Purification: Ion Exchange Chromatography

Conjugation: Unconjugated

Storage: Store undiluted at 2-8°C for one month or (in aliquots) at -20°C for longer.

Avoid repeated freezing and thawing.

Collagen type I Rabbit Polyclonal Antibody - BP8001S

Stability: Shelf life: one year from despatch.

Database Link: P02457

Background: Collagens consist in a family of highly specialized glycoproteins of which at least 16

genetically distinct types are known to date. The basal unit of a collagen molecule cosists in a tripel-helical structure formed by 3 alpha-chains. Predominant amino acids are glycine, proline and hydroxproline. Regularly also lysines and hydroxylysines occur, which are

responsible for cross-linkage and glycosylation of the protein chains. Different composition of alpha-chains and different glycosylation contribute to the high variability of collagens in

different tissues and organs.

Type I collagen (95 kDa) is found in bone, cornea, skin and tendon.

Synonyms: COL1A1, COL1A2, Alpha-1 type I collagen, Alpha-2 type I collagen
