

# Product datasheet for CB503620

### Frozen Tissue Blocks, Ovary

#### **Product data:**

| Product Type:   | Frozen Blocks                             |
|---|---|
| Disease State:  | Cancer                                    |
| Diagnosis Category:                                     | Ovarian Cancer                            |
| Tissue:   | Ovary                                     |
| Frozen Sample ID:                                       | FR00007C14                                |
| Case ID:  | CI000000453                               |
| Tissue of Origin:                                       | Ovary                                     |
| Site of Finding:  | Ovary                                     |
| Appearance:   | Tumor                                     |
| Sample Diagnosis (from<br>Pathology Verification):      | Adenocarcinoma of ovary, papillary serous |
| Normal:   | 0%  |
| Lesional:   | 0%  |
| Tumor:  | 55%                                       |
| Tumor Hypo/Acellular<br>Stroma:                         | 15%                                       |
| Tumor Hypercellular<br>Stroma:                          | 30%                                       |
| Necrosis:   | 0%  |
| CASE Diagnosis (from<br>medical center path<br>report): | Adenocarcinoma of ovary, papillary serous |
| Age:  | 74  |
| Gender:   | Female                                    |
| Tumor Grade:  | FIGO G2: Moderately differentiated        |
| Minimum Stage<br>Grouping:                              | ΙΑ  |
