

# Product datasheet for CB505669

### Frozen Tissue Blocks, Lung

#### **Product data:**

| Product Type:   | Frozen Blocks                    |
|---|----------------------------------|
| Disease State:  | Cancer                           |
| Diagnosis Category:                                     | Lung Cancer                      |
| Tissue:   | Lung                             |
| Frozen Sample ID:                                       | FR00019600                       |
| Case ID:  | CI000005393                      |
| Tissue of Origin:                                       | Lung                             |
| Site of Finding:  | Lung                             |
| Appearance:   | Tumor                            |
| Sample Diagnosis (from<br>Pathology Verification):      | Carcinoma of lung, squamous cell |
| Normal:   | 39%                              |
| Lesional:   | 0%                               |
| Tumor:  | 30%                              |
| Tumor Hypo/Acellular<br>Stroma:                         | 0%                               |
| Tumor Hypercellular<br>Stroma:                          | 30%                              |
| Necrosis:   | 1%                               |
| CASE Diagnosis (from<br>medical center path<br>report): | Carcinoma of lung, squamous cell |
| Age:  | 67                               |
| Gender:   | Female                           |
| Tumor Grade:  | AJCC G3: Poorly differentiated   |
| Minimum Stage<br>Grouping:                              | IB                               |
