| Product Type:   | Frozen Blocks                            |
|---|--|
| Disease State:  | Normal                                   |
| Diagnosis Category:                                     | Normal                                   |
| Tissue:   | Prostate                                 |
| Frozen Sample ID:                                       | FR0003AA33                               |
| Case ID:  | CI0000015750                             |
| Tissue of Origin:                                       | Prostate                                 |
| Site of Finding:  | Prostate                                 |
| Appearance:   | Normal                                   |
| Sample Diagnosis (from<br>Pathology Verification):      | Within normal limits                     |
| Normal:   | 100%                                     |
| Lesional:   | 0%                                       |
| Tumor:  | 0%                                       |
| Tumor Hypo/Acellular<br>Stroma:                         | 0%                                       |
| Tumor Hypercellular<br>Stroma:                          | 0%                                       |
| Necrosis:   | 0%                                       |
| Pathology Verification<br>notes from H&E review:        | 55% Epithelium, 45% Fibromuscular stroma |
| CASE Diagnosis (from<br>medical center path<br>report): | Adenocarcinoma of prostate               |
| Age:  | 64                                       |
| Gender:   | Male                                     |
| Tumor Grade:  | n/a                                      |
