

Product datasheet for **CF500074**

Apolipoprotein M (APOM) Mouse Monoclonal Antibody [Clone ID: OTI3H3]

Product data:

Product Type:	Primary Antibodies
Clone Name:	OTI3H3
Applications:	IHC
Recommended Dilution:	IHC 1:50
Reactivity:	Human
Host:	Mouse
Isotype:	IgG2b
Clonality:	Monoclonal
Immunogen:	Recombinant protein expressed in E.coli corresponding to amino acids 23-188 of human APOM
Formulation:	Lyophilized powder (original buffer 1X PBS, pH 7.3, 8% trehalose)
Reconstitution Method:	For reconstitution, we recommend adding 100uL distilled water to a final antibody concentration of about 1 mg/mL. To use this carrier-free antibody for conjugation experiment, we strongly recommend performing another round of desalting process. (OriGene recommends Zeba Spin Desalting Columns, 7KMWCO from Thermo Scientific)
Purification:	Purified from mouse ascites fluids or tissue culture supernatant by affinity chromatography (protein A/G)
Conjugation:	Unconjugated
Storage:	Store at -20°C as received.
Stability:	Stable for 12 months from date of receipt.
Predicted Protein Size:	21.1 kDa
Gene Name:	apolipoprotein M
Database Link:	NP_061974 Entrez Gene 55937 Human O95445

Background: The APOM is an apolipoprotein and member of the lipocalin protein family. It is found associated with high density lipoproteins and to a lesser extent with low density lipoproteins and triglyceride-rich lipoproteins. The encoded protein is secreted through the plasma membrane but remains membrane-bound, where it is involved in lipid transport. Two transcript variants encoding two different isoforms have been found for this gene, but only one of them has been fully characterized

Synonyms: apo-M; G3a; HSPC336; NG20

Protein Families: Secreted Protein

Product images:

Immunohistochemical staining of paraffin-embedded liver within the normal limits using anti-APOM ([TA500074]) mouse monoclonal antibody. Heat-induced epitope retrieval by EDTA solution buffer pH 8.0 at 120°C for 3 min.
