| Clonality:              | Monoclonal                                                                                                                                                                                                                                                                                                                           |
| Immunogen:              | Recombinant protein expressed in E.coli corresponding to amino acids 154-175 of human stat3                                                                                                                                                                                                                                          |
| Formulation:            | Lyophilized powder (original buffer 1X PBS, pH 7.3, 8% trehalose)                                                                                                                                                                                                                                                                    |
| Reconstitution Method:  | For reconstitution, we recommend adding 100uL distilled water to a final antibody concentration of about 1 mg/mL. To use this carrier-free antibody for conjugation experiment, we strongly recommend performing another round of desalting process. (OriGene recommends Zeba Spin Desalting Columns, 7KMWCO from Thermo Scientific) |
| Purification:           | Purified from mouse ascites fluids or tissue culture supernatant by affinity chromatography<br>(protein A/G)                                                                                                                                                                                                                         |
| Conjugation:            | Unconjugated                                                                                                                                                                                                                                                                                                                         |
| Storage:                | Store at -20°C as received.                                                                                                                                                                                                                                                                                                          |
| Stability:              | Stable for 12 months from date of receipt.                                                                                                                                                                                                                                                                                           |
| Predicted Protein Size: | 88.08 kDa                                                                                                                                                                                                                                                                                                                            |

### STAT3 Mouse Monoclonal Antibody [Clone ID: OTI21E7] – CF500177

| Background:       | The protein encoded by this gene is a member of the STAT protein family. In response to cytokinesand growth factors, STAT family members are phosphorylated by the receptor associated kinases, andthen form homo- or heterodimers that translocate to the cell nucleus where they act astranscription activators. This protein is activated through phosphorylation in response to variouscytokines and growth factors including IFNs, EGF, IL5, IL6, HGF, LIF and BMP2. This proteinmediates the expression of a variety of genes in response to cell stimuli, and thus plays a keyrole in many cellular processes such as cell growth and apoptosis. The small GTPase Rac1 has beenshown to bind and regulate the activity of this protein. PIAS3 protein is a specific inhibitor of this protein. Three alternatively spliced transcript variants encoding distinct isoforms have beendescribed |

Protein Pathways:Acute myeloid leukemia, Adipocytokine signaling pathway, Chemokine signaling pathway, Jak-<br/>STAT signaling pathway, Pancreatic cancer, Pathways in cancer

### **Product images:**

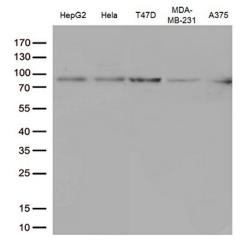

HEK293T cells were transfected with the pCMV6-ENTRY control (Cat# [PS100001], Left lane) or pCMV6-ENTRY STAT3 (Cat# [RC212394], Right lane) cDNA for 48 hrs and lysed. Equivalent amounts of cell lysates (5 ug per lane) were separated by SDS-PAGE and immunoblotted with anti-STAT3(Cat# [TA500177]). Positive lysates [LY403728] (100ug) and [LC403728] (20ug) can be purchased separately from OriGene.

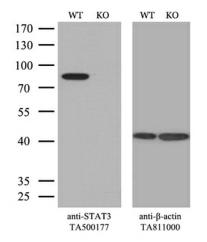

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2025 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

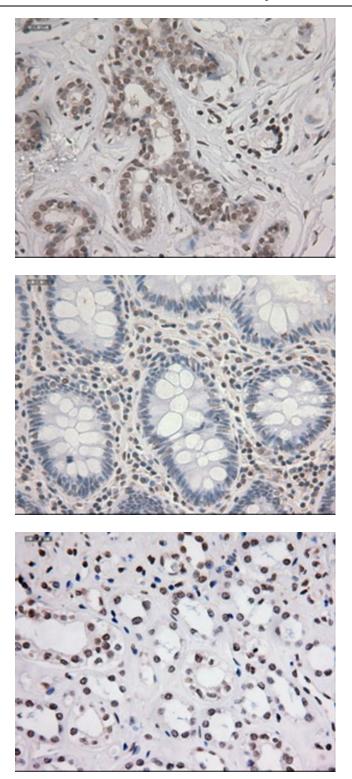

Western blot analysis of extracts (35ug) from different cell line by using anti-STAT3 monoclonal antibody (1:500).

Western blot analysis of extracts (35ug) from different cell line by using anti-STAT3 monoclonal antibody (1:500).

Equivalent amounts of cell lysates (10 ug per lane) of wild-type Hela cells (WT, Cat# LC810HELA) and STAT3-Knockout Hela cells (KO, Cat# [LC810228]) were separated by SDS-PAGE and immunoblotted with anti-STAT3 monoclonal antibody [TA500177]. Then the blotted membrane was stripped and reprobed with antib-actin antibody ([TA811000]) as a loading control (1:500).

Immunohistochemical staining of paraffinembedded breast within the normal limits using anti-STAT3 ([TA500177]) mouse monoclonal antibody. Heat-induced epitope retrieval by EDTA solution buffer pH 8.0 at 120°C for 3 min.

Immunohistochemical staining of paraffinembedded colon within the normal limits using anti-STAT3 ([TA500177]) mouse monoclonal antibody. Heat-induced epitope retrieval by EDTA solution buffer pH 8.0 at 120°C for 3 min.

Immunohistochemical staining of paraffinembedded kidney within the normal limits using anti-STAT3 ([TA500177]) mouse monoclonal antibody. Heat-induced epitope retrieval by EDTA solution buffer pH 8.0 at 120°C for 3 min.

Immunohistochemical staining of paraffinembedded Carcinoma of kidney using anti-STAT3 ([TA500177]) mouse monoclonal antibody. Heatinduced epitope retrieval by EDTA solution buffer pH 8.0 at 120°C for 3 min.

Immunohistochemical staining of paraffinembedded lung within the normal limits using anti-STAT3 ([TA500177]) mouse monoclonal antibody. Heat-induced epitope retrieval by EDTA solution buffer pH 8.0 at 120°C for 3 min.

Immunohistochemical staining of paraffinembedded Carcinoma of lung using anti-STAT3 ([TA500177]) mouse monoclonal antibody. Heatinduced epitope retrieval by EDTA solution buffer pH 8.0 at 120°C for 3 min.
