TPMT Mouse Monoclonal Antibody [Clone ID: OTI2A2]

Product data:

Product Type: Primary Antibodies

Clone Name: OTI2A2

Applications: IF, IHC, WB

Recommended Dilution: WB 1:1000, IHC 1:50, IF 1:100

Reactivity: Human
Host: Mouse
Isotype: IgG1

Clonality: Monoclonal

Immunogen: Full length human recombinant protein of human TPMT (NP_000358) produced in HEK293T

cell

Formulation: Lyophilized powder (original buffer 1X PBS, pH 7.3, 8% trehalose)

Reconstitution Method: For reconstitution, we recommend adding 100uL distilled water to a final antibody

concentration of about 1 mg/mL. To use this carrier-free antibody for conjugation experiment, we strongly recommend performing another round of desalting process. (OriGene recommends Zeba Spin Desalting Columns, 7KMWCO from Thermo Scientific)

Purification: Purified from mouse ascites fluids or tissue culture supernatant by affinity chromatography

(protein A/G)

Conjugation: Unconjugated

Storage: Store at -20°C as received.

Stability: Stable for 12 months from date of receipt.

Predicted Protein Size: 28.2 kDa

Gene Name: thiopurine S-methyltransferase

Database Link: NP 000358

Entrez Gene 7172 Human

P51580

Background: This gene encodes the enzyme that metabolizes thiopurine drugs via S-adenosyl-L-

methionine as the S-methyl donor and S-adenosyl-L-homocysteine as a byproduct.

Thiopurine drugs such as 6-mercaptopurine are used as chemotherapeutic agents. Genetic polymorphisms that affect this enzymatic activity are correlated with variations in sensitivity and toxicity to such drugs within individuals. A pseudogene for this locus is located on

chromosome 18q.

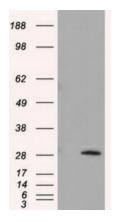

Synonyms: OTTHUMP00000016076; S-adenosyl-L-methionine:thiopurine S-methyltransferase; thiopurine

methyltransferase; thiopurine S-methyltransferase

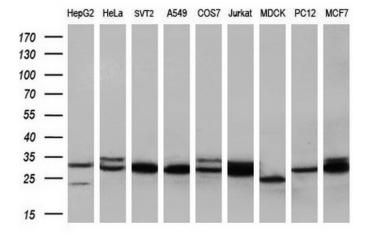

Protein Families: Druggable Genome

Protein Pathways: Drug metabolism - other enzymes

Product images:

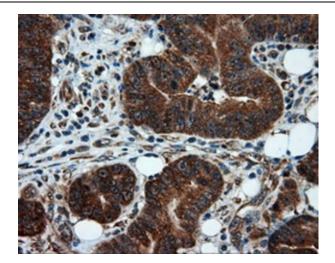

HEK293T cells were transfected with the pCMV6-ENTRY control (Cat# [PS100001], Left lane) or pCMV6-ENTRY TPMT (Cat# [RC203309], Right lane) cDNA for 48 hrs and lysed. Equivalent amounts of cell lysates (5 ug per lane) were separated by SDS-PAGE and immunoblotted with anti-TPMT(Cat# [TA500966]). Positive lysates [LY400131] (100ug) and [LC400131] (20ug) can be purchased separately from OriGene.

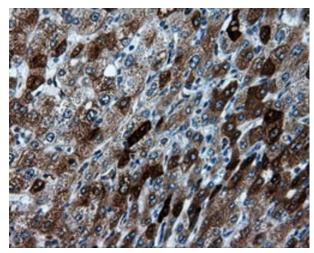

Western blot analysis of extracts (35ug) from 9 different cell lines by using anti-TPMT monoclonal antibody (HepG2: human; HeLa: human; SVT2: mouse; A549: human; COS7: monkey; Jurkat: human; MDCK: canine; PC12: rat; MCF7: human) (1:200).

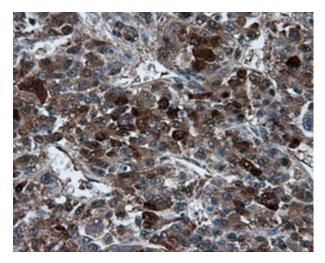

Immunohistochemical staining of paraffinembedded Adenocarcinoma of colon tissue using anti-TPMT mouse monoclonal antibody. Heatinduced epitope retrieval by EDTA solution buffer pH 8.0 at 120°C for 3 min.

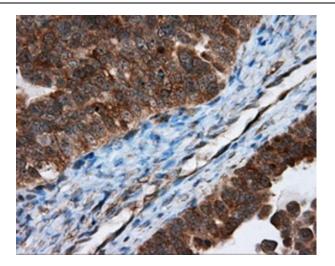

Immunohistochemical staining of paraffinembedded liver tissue within the normal limits using anti-TPMT mouse monoclonal antibody. Heat-induced epitope retrieval by EDTA solution buffer pH 8.0 at 120°C for 3 min.

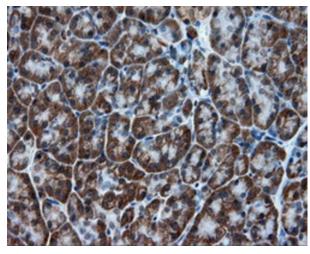

Immunohistochemical staining of paraffinembedded Carcinoma of liver tissue using anti-TPMT mouse monoclonal antibody. Heat-induced epitope retrieval by EDTA solution buffer pH 8.0 at 120°C for 3 min.

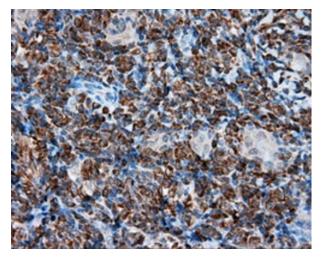

Immunohistochemical staining of paraffinembedded Adenocarcinoma of ovary tissue using anti-TPMT mouse monoclonal antibody. Heatinduced epitope retrieval by EDTA solution buffer pH 8.0 at 120°C for 3 min.

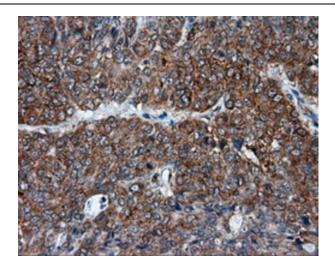

Immunohistochemical staining of paraffinembedded pancreas tissue within the normal limits using anti-TPMT mouse monoclonal antibody. Heat-induced epitope retrieval by EDTA solution buffer pH 8.0 at 120°C for 3 min.

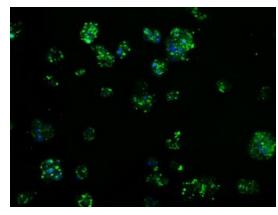

Immunohistochemical staining of paraffinembedded Carcinoma of thyroid tissue using anti-TPMT mouse monoclonal antibody. Heatinduced epitope retrieval by EDTA solution buffer pH 8.0 at 120°C for 3 min.

Immunohistochemical staining of paraffinembedded Adenocarcinoma of endometrium tissue using anti-TPMT mouse monoclonal antibody. Heat-induced epitope retrieval by EDTA solution buffer pH 8.0 at 120°C for 3 min.

Immunofluorescent staining of HepG2 cells using anti-TPMT mouse monoclonal antibody ([TA500966]).
