## LIPG Mouse Monoclonal Antibody [Clone ID: OTI2D5]

**Product data:** 

**Product Type:** Primary Antibodies

Clone Name: OTI2D5

**Applications:** FC, IF, IHC, IP, WB

**Recommended Dilution:** WB 1:2000, IHC 1:50, IF 1:100, FLOW 1:100, IP 2ug/500ul

Reactivity: Human
Host: Mouse
Isotype: IgG1

Clonality: Monoclonal

Immunogen: Full length human recombinant protein of human LIPG (NP\_006024) produced in HEK293T

cell.

Formulation: Lyophilized powder (original buffer 1X PBS, pH 7.3, 8% trehalose)

**Reconstitution Method:** For reconstitution, we recommend adding 100uL distilled water to a final antibody

concentration of about 1 mg/mL. To use this carrier-free antibody for conjugation experiment, we strongly recommend performing another round of desalting process. (OriGene recommends Zeba Spin Desalting Columns, 7KMWCO from Thermo Scientific)

**Purification:** Purified from mouse ascites fluids or tissue culture supernatant by affinity chromatography

(protein A/G)

Conjugation: Unconjugated

**Storage:** Store at -20°C as received.

**Stability:** Stable for 12 months from date of receipt.

Predicted Protein Size: 54.6 kDa

**Gene Name:** lipase G, endothelial type

Database Link: NP 006024

Entrez Gene 9388 Human

Q9Y5X9

**Background:** The protein encoded by this gene has substantial phospholipase activity and may be involved

in lipoprotein metabolism and vascular biology. This protein is designated a member of the TG lipase family by its sequence and characteristic lid region which provides substrate

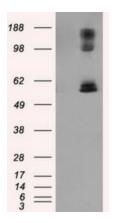

specificity for enzymes of the TG lipase family. [provided by RefSeq]

**Synonyms:** EDL; EL; PRO719

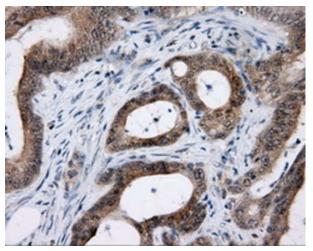

**Protein Families:** Druggable Genome, Secreted Protein

**Protein Pathways:** Glycerolipid metabolism, Metabolic pathways

## **Product images:**

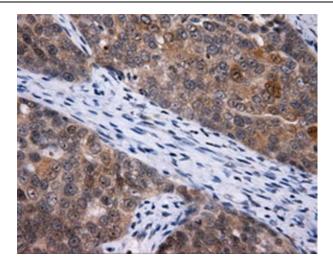

HEK293T cells were transfected with the pCMV6-ENTRY control (Left lane) or pCMV6-ENTRY LIPG ([RC209248], Right lane) cDNA for 48 hrs and lysed. Equivalent amounts of cell lysates (5 ug per lane) were separated by SDS-PAGE and immunoblotted with anti-LIPG. Positive lysates [LY401821] (100ug) and [LC401821] (20ug) can be purchased separately from OriGene.

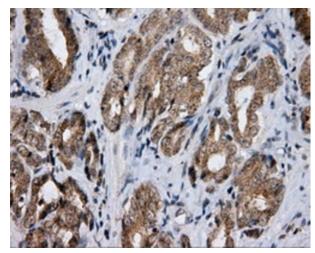

Immunohistochemical staining of paraffinembedded Adenocarcinoma of Human colon tissue using anti-LIPG mouse monoclonal antibody. Heat-induced epitope retrieval by EDTA solution buffer pH 8.0 at 120°C for 3 min.

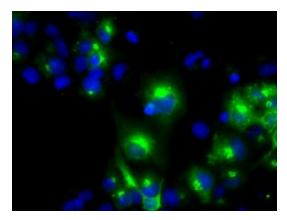

Immunohistochemical staining of paraffinembedded Adenocarcinoma of Human ovary tissue using anti-LIPG mouse monoclonal antibody. Heat-induced epitope retrieval by EDTA solution buffer pH 8.0 at 120°C for 3 min.

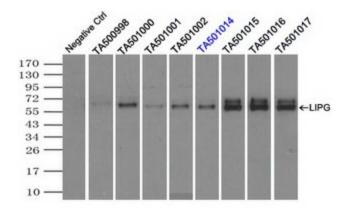

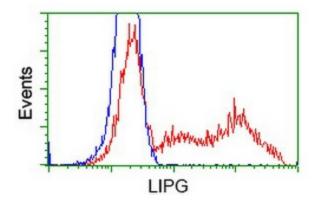

Immunohistochemical staining of paraffinembedded Carcinoma of Human prostate tissue using anti-LIPG mouse monoclonal antibody. Heat-induced epitope retrieval by EDTA solution buffer pH 8.0 at 120°C for 3 min.

Anti-LIPG mouse monoclonal antibody ([TA501014]) immunofluorescent staining of COS7 cells transiently transfected by pCMV6-ENTRY LIPG ([RC209248]).

Immunoprecipitation (IP) of LIPG by using TrueMab monoclonal anti-LIPG antibodies (Negative control: IP without adding anti-LIPG antibody.). For each experiment, 500ul of DDK tagged LIPG overexpression lysates (at 1:5 dilution with HEK293T lysate), 2ug of anti-LIPG antibody and 20ul (0.1mg) of goat anti-mouse conjugated magnetic beads were mixed and incubated overnight. After extensive wash to remove any non-specific binding, the immunoprecipitated products were analyzed with rabbit anti-DDK polyclonal antibody.

HEK293T cells transfected with either [RC209248] overexpress plasmid (Red) or empty vector control plasmid (Blue) were immunostained by anti-LIPG antibody ([TA501014]), and then analyzed by flow cytometry.
