HIBCH Mouse Monoclonal Antibody [Clone ID: OTI4G1]

Product data:

Product Type: Primary Antibodies

Clone Name: OTI4G1
Applications: FC, IF, WB

Recommended Dilution: WB 1:500~2000, IF 1:100, FLOW 1:100

Reactivity: Human, Dog, Rat, Monkey

Host: Mouse Isotype: IgG2b

Clonality: Monoclonal

Immunogen: Full length human recombinant protein of human HIBCH (NP_055177) produced in HEK293T

cell

Formulation: Lyophilized powder (original buffer 1X PBS, pH 7.3, 8% trehalose)

Reconstitution Method: For reconstitution, we recommend adding 100uL distilled water to a final antibody

concentration of about 1 mg/mL. To use this carrier-free antibody for conjugation experiment, we strongly recommend performing another round of desalting process. (OriGene recommends Zeba Spin Desalting Columns, 7KMWCO from Thermo Scientific)

Purification: Purified from mouse ascites fluids or tissue culture supernatant by affinity chromatography

(protein A/G)

Conjugation: Unconjugated

Storage: Store at -20°C as received.

Stability: Stable for 12 months from date of receipt.

Predicted Protein Size: 39.4 kDa

Gene Name: 3-hydroxyisobutyryl-CoA hydrolase

Database Link: NP 055177

Q6NVY1

HIBCH Mouse Monoclonal Antibody [Clone ID: OTI4G1] - CF501330

Background: This gene encodes the enzyme responsible for hydrolysis of both HIBYL-CoA and beta-

hydroxypropionyl-CoA. Mutations in this gene have been associated with 3-hyroxyisobutyryl-

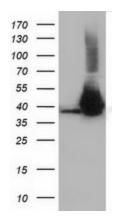

CoA hydrolase deficiency. Alternative splicing results in multiple transcript variants.

Synonyms: HIBYLCOAH

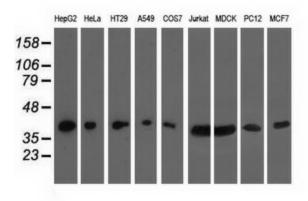

Protein Pathways: beta-Alanine metabolism, Metabolic pathways, Propanoate metabolism, Valine, leucine and

isoleucine degradation

Product images:

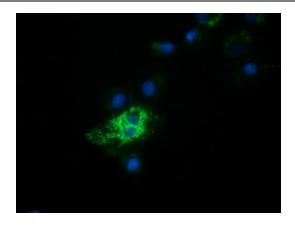

HEK293T cells were transfected with the pCMV6-ENTRY control (Left lane) or pCMV6-ENTRY HIBCH ([RC209814], Right lane) cDNA for 48 hrs and lysed. Equivalent amounts of cell lysates (5 ug per lane) were separated by SDS-PAGE and immunoblotted with anti-HIBCH. Positive lysates [LY402324] (100ug) and [LC402324] (20ug) can be purchased separately from OriGene.

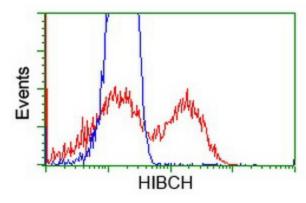

Western blot analysis of extracts (35ug) from 9 different cell lines by using anti-HIBCH monoclonal antibody.

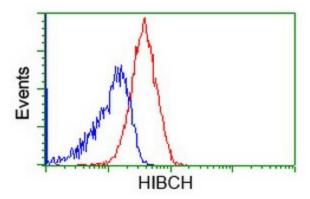

Anti-HIBCH mouse monoclonal antibody ([TA501330]) immunofluorescent staining of COS7 cells transiently transfected by pCMV6-ENTRY HIBCH ([RC209814]).

HEK293T cells transfected with either [RC209814] overexpress plasmid (Red) or empty vector control plasmid (Blue) were immunostained by anti-HIBCH antibody ([TA501330]), and then analyzed by flow cytometry.

Flow cytometric Analysis of Jurkat cells, using anti-HIBCH antibody ([TA501330]), (Red), compared to a nonspecific negative control antibody (TA50011), (Blue).
