IVD Mouse Monoclonal Antibody [Clone ID: OTI5A11]

Product data:

Product Type: Primary Antibodies

Clone Name: OTI5A11
Applications: FC, IF, WB

Recommended Dilution: WB 1:500~2000, IF 1:100, FLOW 1:100

Reactivity: Human, Dog, Rat, Monkey, Mouse

Host: Mouse Isotype: IgG1

Clonality: Monoclonal

Immunogen: Full length human recombinant protein of human IVD (NP_002612) produced in HEK293T

cell

Formulation: Lyophilized powder (original buffer 1X PBS, pH 7.3, 8% trehalose)

Reconstitution Method: For reconstitution, we recommend adding 100uL distilled water to a final antibody

concentration of about 1 mg/mL. To use this carrier-free antibody for conjugation experiment, we strongly recommend performing another round of desalting process. (OriGene recommends Zeba Spin Desalting Columns, 7KMWCO from Thermo Scientific)

Purification: Purified from mouse ascites fluids or tissue culture supernatant by affinity chromatography

(protein A/G)

Conjugation: Unconjugated

Storage: Store at -20°C as received.

Stability: Stable for 12 months from date of receipt.

Predicted Protein Size: 46.5 kDa

Gene Name: isovaleryl-CoA dehydrogenase

Database Link: NP 002216

P26440

Background: Isovaleryl-CoA dehydrogenase (IVD) is a mitochondrial matrix enzyme that catalyzes the third

step in leucine catabolism. The genetic deficiency of IVD results in an accumulation of isovaleric acid, which is toxic to the central nervous system and leads to isovaleric acidemia. Alternatively spliced transcript variants encoding different isoforms have been found for this

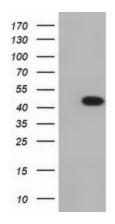

gene. [provided by RefSeq]

Synonyms: ACAD2; IVDH

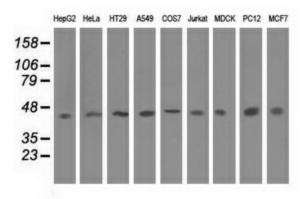

Protein Families: Druggable Genome

Protein Pathways: Metabolic pathways, Valine, leucine and isoleucine degradation

Product images:

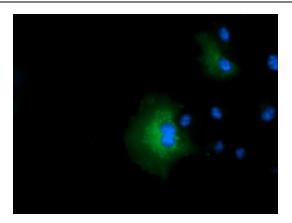

HEK293T cells were transfected with the pCMV6-ENTRY control (Cat# [PS100001], Left lane) or pCMV6-ENTRY IVD (Cat# [RC229217], Right lane) cDNA for 48 hrs and lysed. Equivalent amounts of cell lysates (5 ug per lane) were separated by SDS-PAGE and immunoblotted with anti-IVD(Cat# [TA501544]). Positive lysates [LY432239] (100ug) and [LC432239] (20ug) can be purchased separately from OriGene.

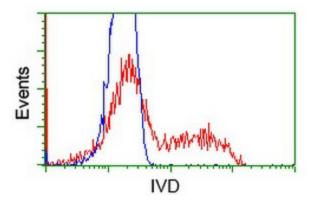

Western blot analysis of extracts (35ug) from 9 different cell lines by using anti-IVD monoclonal antibody.

Anti-IVD mouse monoclonal antibody ([TA501544]) immunofluorescent staining of COS7 cells transiently transfected by pCMV6-ENTRY IVD ([RC201077]).

HEK293T cells transfected with either [RC201077] overexpress plasmid (Red) or empty vector control plasmid (Blue) were immunostained by anti-IVD antibody ([TA501544]), and then analyzed by flow cytometry.
