## Product datasheet for CF501882

### Glutathione S Transferase theta 2 (GSTT2) Mouse Monoclonal Antibody [Clone ID: OTI4F9]

#### **Product data:**

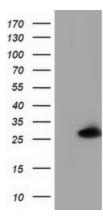

Product Type:	Primary Antibodies
Clone Name:	OTI4F9
Applications:	FC, IF, WB
Recommended Dilution:	WB 1:500~2000, IF 1:100, FLOW 1:100
Reactivity:	Human
Host:	Mouse
lsotype:	lgG2b
Clonality:	Monoclonal
Immunogen:	Full length human recombinant protein of human GSTT2 (NP_000845) produced in HEK293T cell.
Formulation:	Lyophilized powder (original buffer 1X PBS, pH 7.3, 8% trehalose)
Reconstitution Method:	For reconstitution, we recommend adding 100uL distilled water to a final antibody concentration of about 1 mg/mL. To use this carrier-free antibody for conjugation experiment, we strongly recommend performing another round of desalting process. (OriGene recommends Zeba Spin Desalting Columns, 7KMWCO from Thermo Scientific)
Purification:	Purified from mouse ascites fluids or tissue culture supernatant by affinity chromatography (protein A/G)
Conjugation:	Unconjugated
Storage:	Store at -20°C as received.
Stability:	Stable for 12 months from date of receipt.
Predicted Protein Size:	27.3 kDa
Gene Name:	glutathione S-transferase theta 2 (gene/pseudogene)
Database Link:	<u>NP_000845</u> <u>Entrez Gene 2953 Human</u> <u>P0CG29</u>

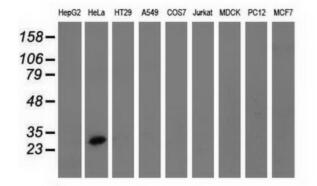

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2024 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

	Glutathione S Transferase theta 2 (GSTT2) Mouse Monoclonal Antibody [Clone ID: OTI4F9] – CF501882
Background:	Glutathione S-transferase (GSTs) theta 2 (GSTT2) is a member of a superfamily of proteins that catalyze the conjugation of reduced glutathione to a variety of electrophilic and hydrophobic compounds. Human GSTs can be divided into five main classes: Alpha, Mu, Pi, Theta, and Zeta. The theta class members GSTT1 and GSTT2 share 55% amino acid sequence identity and both are thought to have an important role in human carcinogenesis. The theta genes have a similar structure, being composed of five exons with identical exon/intron boundaries. [provided by RefSeq]
Synonyms:	GSTT2B
Protein Pathway	<b>ys:</b> Drug metabolism - cytochrome P450, Glutathione metabolism, Metabolism of xenobiotics by cytochrome P450

#### **Product images:**

HEK293T cells were transfected with the pCMV6-ENTRY control (Left lane) or pCMV6-ENTRY GSTT2 ([RC200040], Right lane) cDNA for 48 hrs and lysed. Equivalent amounts of cell lysates (5 ug per lane) were separated by SDS-PAGE and immunoblotted with anti-GSTT2. Positive lysates [LY424485] (100ug) and [LC424485] (20ug) can be purchased separately from OriGene.

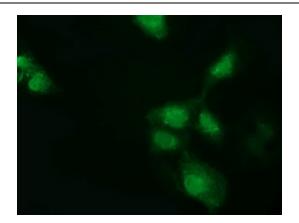

Western blot analysis of extracts (35ug) from 9 different cell lines by using anti-GSTT2 monoclonal antibody.

# Glutathione S Transferase theta 2 (GSTT2) Mouse Monoclonal Antibody [Clone ID: OTI4F9] – CF501882

Anti-GSTT2 mouse monoclonal antibody ([TA501882]) immunofluorescent staining of COS7 cells transiently transfected by pCMV6-ENTRY GSTT2 ([RC200040]).

HEK293T cells transfected with either [RC200040] overexpress plasmid (Red) or empty vector control plasmid (Blue) were immunostained by anti-GSTT2 antibody ([TA501882]), and then analyzed by flow cytometry.
