# Product datasheet for CF502104

# MYD88 Mouse Monoclonal Antibody [Clone ID: OTI1B4]

## **Product data:**

Product Type:	Primary Antibodies		
Clone Name:	OTI1B4		
Applications:	FC, IF, WB		
Recommended Dilution:	WB 1:2000, IF 1:100, FLOW 1:100		
Reactivity:	Human		
Host:	Mouse		
lsotype:	lgG2a		
Clonality:	Monoclonal		
Immunogen:	Full length human recombinant protein of human MYD88 (NP_002459) produced in HEK293T cell.		
Formulation:	Lyophilized powder (original buffer 1X PBS, pH 7.3, 8% trehalose)		
Reconstitution Method:	For reconstitution, we recommend adding 100uL distilled water to a final antibody concentration of about 1 mg/mL. To use this carrier-free antibody for conjugation experiment, we strongly recommend performing another round of desalting process. (OriGene recommends Zeba Spin Desalting Columns, 7KMWCO from Thermo Scientific)		
Purification:	Purified from mouse ascites fluids or tissue culture supernatant by affinity chromatography (protein A/G)		
Conjugation:	Unconjugated		
Storage:	Store at -20°C as received.		
Stability:	Stable for 12 months from date of receipt.		
Predicted Protein Size:	33.1 kDa		
Gene Name:	MYD88 innate immune signal transduction adaptor		
Database Link:	<u>NP_002459</u> <u>Entrez Gene 4615 Human</u> <u>Q99836</u>		

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2024 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

	MYD88 Mouse Monoclonal Antibody [Clone ID: OTI1B4] – CF502104
Background:	This gene encodes a cytosolic adapter protein that plays a central role in the innate and adaptive immune response. This protein functions as an essential signal transducer in the interleukin-1 and Toll-like receptor signaling pathways. These pathways regulate that activation of numerous proinflammatory genes. The encoded protein consists of an N- terminal death domain and a C-terminal Toll-interleukin1 receptor domain. Patients with defects in this gene have an increased susceptibility to pyogenic bacterial infections. Alternate splicing results in multiple transcript variants. [provided by RefSeq]
Synonyms:	MYD88D
Protein Families	: Druggable Genome
Protein Pathway	<i>ys:</i> Apoptosis, Toll-like receptor signaling pathway

HEK293T cells were transfected with the pCMV6-ENTRY control (Left lane) or pCMV6-ENTRY MYD88 ([RC229151], Right lane) cDNA for 48 hrs and lysed. Equivalent amounts of cell lysates (5 ug per lane) were separated by SDS-PAGE and immunoblotted with anti-MYD88. Positive lysates [LY432175] (100ug) and [LC432175] (20ug) can be purchased separately from OriGene.

Anti-MYD88 mouse monoclonal antibody ([TA502104]) immunofluorescent staining of COS7 cells transiently transfected by pCMV6-ENTRY MYD88 ([RC202253]).

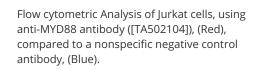

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2024 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

MYD88

HEK293T cells transfected with either [RC202253] overexpress plasmid (Red) or empty vector control plasmid (Blue) were immunostained by anti-MYD88 antibody ([TA502104]), and then analyzed by flow cytometry.

Flow cytometric Analysis of Hela cells, using anti-MYD88 antibody ([TA502104]), (Red), compared to a nonspecific negative control antibody, (Blue).
