Product datasheet for CF502542

GBA3 Mouse Monoclonal Antibody [Clone ID: OTI4G8]

Product data:

Product Type:	Primary Antibodies
Clone Name:	OTI4G8
Applications:	FC, WB
Recommended Dilution:	WB 1:500~2000, FLOW 1:100
Reactivity:	Human
Host:	Mouse
Isotype:	IgG1
Clonality:	Monoclonal
Immunogen:	Human recombinant protein fragment corresponding to amino acids 1-150 and 370-469 of human GBA3 (NP_066024) produced in HEK293T cell.
Formulation:	Lyophilized powder (original buffer 1X PBS, pH 7.3, 8% trehalose)
Reconstitution Method:	For reconstitution, we recommend adding 100uL distilled water to a final antibody concentration of about 1 mg/mL. To use this carrier-free antibody for conjugation experiment, we strongly recommend performing another round of desalting process. (OriGene recommends Zeba Spin Desalting Columns, 7KMWCO from Thermo Scientific)
Purification:	Purified from mouse ascites fluids or tissue culture supernatant by affinity chromatography (protein A/G)
Conjugation:	Unconjugated
Storage:	Store at -20°C as received.
Stability:	Stable for 12 months from date of receipt.
Predicted Protein Size:	53.5 kDa
Gene Name:	glucosylceramidase beta 3 (gene/pseudogene)
Database Link:	NP_066024 Entrez Gene 57733 Human Q9H227

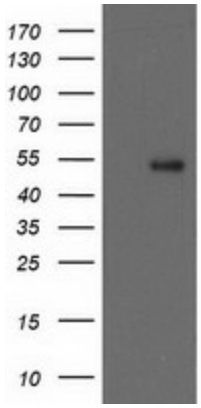
Background: GBA3, or cytosolic beta-glucosidase (EC 3.2.1.21), is a predominantly liver enzyme that efficiently hydrolyzes beta-D-glucoside and beta-D-galactoside, but not any known physiologic beta-glycoside, suggesting that it may be involved in detoxification of plant glycosides (de Graaf et al., 2001 [PubMed 11389701]). GBA3 also has significant neutral glycosylceramidase activity (EC 3.2.1.62), suggesting that it may be involved in a nonlysosomal catabolic pathway of glucosylceramide metabolism (Hayashi et al., 2007 [PubMed 17595169]). [supplied by OMIM]

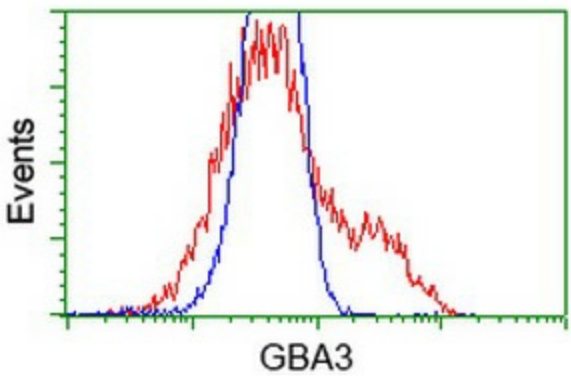
Synonyms: CBG; CBGL1; GLUC; KLRP

Protein Pathways: Cyanoamino acid metabolism, Starch and sucrose metabolism

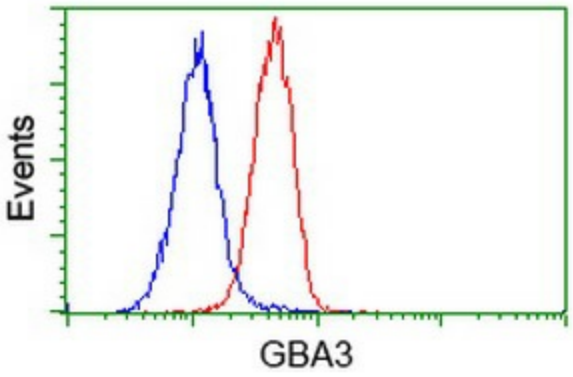
Product images:



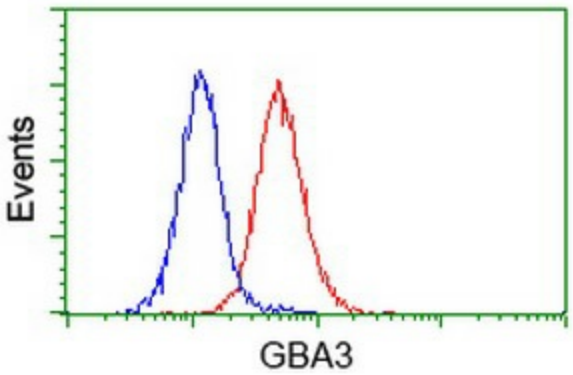
HEK293T cells were transfected with the pCMV6-ENTRY control (Left lane) or pCMV6-ENTRY GBA3 ([RC211035], Right lane) cDNA for 48 hrs and lysed. Equivalent amounts of cell lysates (5 ug per lane) were separated by SDS-PAGE and immunoblotted with anti-GBA3. Positive lysates [LY402815] (100ug) and [LC402815] (20ug) can be purchased separately from OriGene.



HEK293T cells transfected with either [RC211035] overexpress plasmid (Red) or empty vector control plasmid (Blue) were immunostained by anti-GBA3 antibody ([TA502542]), and then analyzed by flow cytometry.



Flow cytometric Analysis of Hela cells, using anti-GBA3 antibody ([TA502542]), (Red), compared to a nonspecific negative control antibody (TA50011), (Blue).



Flow cytometric Analysis of Jurkat cells, using anti-GBA3 antibody ([TA502542]), (Red), compared to a nonspecific negative control antibody (TA50011), (Blue).
