

Product datasheet for CF502693

SSX1 Mouse Monoclonal Antibody [Clone ID: OTI1B5]

Product data:

Product Type:	Primary Antibodies
Clone Name:	OTI1B5
Applications:	FC, IF, WB
Recommended Dilution:	WB 1:2000, IF 1:100, FLOW 1:100
Reactivity:	Human
Host:	Mouse
lsotype:	lgG1
Clonality:	Monoclonal
Immunogen:	Full length human recombinant protein of human SSX1 (NP_005626) produced in E.coli.
Formulation:	Lyophilized powder (original buffer 1X PBS, pH 7.3, 8% trehalose)
Reconstitution Method:	For reconstitution, we recommend adding 100uL distilled water to a final antibody concentration of about 1 mg/mL. To use this carrier-free antibody for conjugation experiment, we strongly recommend performing another round of desalting process. (OriGene recommends Zeba Spin Desalting Columns, 7KMWCO from Thermo Scientific)
Purification:	Purified from mouse ascites fluids or tissue culture supernatant by affinity chromatography (protein A/G)
Conjugation:	Unconjugated
Storage:	Store at -20°C as received.
Stability:	Stable for 12 months from date of receipt.
Predicted Protein Size:	21.8 kDa
Gene Name:	SSX family member 1
Database Link:	<u>NP_005626</u> <u>Entrez Gene 6756 Human</u> <u>Q16384</u>

GRIGENE SSX1 Mouse Monoclonal Antibody [Clone ID: OTI1B5] – CF502693

Background:The product of this gene belongs to the family of highly homologous synovial sarcoma X (SSX)
breakpoint proteins. These proteins may function as transcriptional repressors. They are also
capable of eliciting spontaneously humoral and cellular immune responses in cancer
patients, and are potentially useful targets in cancer vaccine-based immunotherapy. SSX1,
SSX2 and SSX4 genes have been involved in the t(X;18) translocation characteristically found
in all synovial sarcomas. This translocation results in the fusion of the synovial sarcoma
translocation gene on chromosome 18 to one of the SSX genes on chromosome X. The
encoded hybrid proteins are probably responsible for transforming activity. [provided by
RefSeq]

Synonyms:	CT5.1; SSRC

Protein Families:

Transcription Factors

Product images:

HEK293T cells were transfected with the pCMV6-ENTRY control (Left lane) or pCMV6-ENTRY SSX1 ([RC201600], Right lane) cDNA for 48 hrs and lysed. Equivalent amounts of cell lysates (5 ug per lane) were separated by SDS-PAGE and immunoblotted with anti-SSX1. Positive lysates [LY417166] (100ug) and [LC417166] (20ug) can be purchased separately from OriGene.

Anti-SSX1 mouse monoclonal antibody ([TA502693]) immunofluorescent staining of COS7 cells transiently transfected by pCMV6-ENTRY SSX1 ([RC201600]).

HEK293T cells transfected with either [RC201600] overexpress plasmid (Red) or empty vector control plasmid (Blue) were immunostained by anti-SSX1 antibody ([TA502693]), and then analyzed by flow cytometry.

Flow cytometric Analysis of Hela cells, using anti-SSX1 antibody ([TA502693]), (Red), compared to a nonspecific negative control antibody (TA50011), (Blue).
