### **TOMM34 Mouse Monoclonal Antibody [Clone ID: OTI 2E11]**

#### **Product data:**

**Product Type:** Primary Antibodies

Clone Name: OTI 2E11
Applications: FC, WB

Recommended Dilution: WB 1:2000, FLOW 1:100

Reactivity: Human, Mouse, Rat

Host: Mouse Isotype: IgG1

Clonality: Monoclonal

Immunogen: Full length human recombinant protein of human TOMM34 (NP\_006800) produced in

HEK293T cell.

Formulation: Lyophilized powder (original buffer 1X PBS, pH 7.3, 8% trehalose)

**Reconstitution Method:** For reconstitution, we recommend adding 100uL distilled water to a final antibody

concentration of about 1 mg/mL. To use this carrier-free antibody for conjugation experiment, we strongly recommend performing another round of desalting process. (OriGene recommends Zeba Spin Desalting Columns, 7KMWCO from Thermo Scientific)

**Purification:** Purified from mouse ascites fluids or tissue culture supernatant by affinity chromatography

(protein A/G)

Conjugation: Unconjugated

**Storage:** Store at -20°C as received.

**Stability:** Stable for 12 months from date of receipt.

Predicted Protein Size: 34.4 kDa

**Gene Name:** translocase of outer mitochondrial membrane 34

Database Link: NP 006800

Entrez Gene 10953 Human

Q15785

**Background:** The protein encoded by this gene is involved in the import of precursor proteins into

mitochondria. The encoded protein has a chaperone-like activity, binding the mature portion of unfolded proteins and aiding their import into mitochondria. This protein, which is found in the cytoplasm and sometimes associated with the outer mitochondrial membrane, has a

weak ATPase activity and contains 6 TPR repeats. [provided by RefSeq, Jul 2008]

Synonyms: HTOM34P; TOM34; URCC3

**Protein Families:** Druggable Genome

## **Product images:**

HEK293T cells were transfected with the pCMV6-ENTRY control (Left lane) or pCMV6-ENTRY TOMM34 ([RC201083], Right lane) cDNA for 48 hrs and lysed. Equivalent amounts of cell lysates (5 ug per lane) were separated by SDS-PAGE and immunoblotted with anti-TOMM34. Positive lysates [LY416405] (100ug) and [LC416405] (20ug) can be purchased separately from OriGene.

HEK293T cells transfected with either [RC201083] overexpress plasmid (Red) or empty vector control plasmid (Blue) were immunostained by anti-TOMM34 antibody ([TA503077]), and then analyzed by flow cytometry.
